One WASH National Program – CWA 2007 Annual Report

1. Part One. Introduction

1.1. General Information

One WaSH National Program (OWNP) advocates for one plan, one budget, one reporting system and one Consolidated WaSH Account (CWA). The government of Ethiopia, together with sector development partners has taken up the challenge to enable the Water Sanitation and Hygiene sub sector to move from a projectized intervention to a more comprehensive and programmatic approach. The effort here includes the signing of MoU among the WaSH sector institutions (March 2006), the signing of WaSH implementation framework (March 2013), the preparation of the One WaSH program document (August 2013), the documentation of lessons from the closed projects (AfDB, IDA/DFID, April 2014) and more recently the preparation of the WaSH program Operations Manual (POM, Sept. 2014). OWNP is the government of Ethiopia’s flag ship program for the sub sector to be financed with multiple channels of which the use of the government of Ethiopia mainstream financing (Channel 1B) is one of them.

To guide the implementation of the CWA, a Program Operations Manual (POM) was prepared by the National WaSH Coordination Office and was endorsed by all pooling partners (AfDB, DFID, IDA, and UNICEF) that have agreed to pool their resource in to a Consolidated WaSH Account (CWA) to finance part of the National Program.

Table:-1 Program information

Program name:	<i>One WaSH National Program Consolidated WaSH Account</i>
Program development objective	<i>“Increased access to improved water supply and sanitation services for residents in participating Woredas, towns and communities in Ethiopia”</i>
Program Duration	<i>Five Years 2014 – 2018</i>
Project Commencement	<i>2014/15</i>
Financers	<i>GoE, Communities, AfDB, DFID, WB, UNICEF</i>
Intervention Area:	<i>382 Rural Woredas, 144 small and medium urban towns (124 Small towns & 20 medium towns)</i>
Program Components:	<i>Rural and institutional WaSH, Urban WaSH and Program management and Capacity Building</i>
Program Direct Beneficiaries:	<i>5.96 million (3.8 million rural and 2.16 million urban)</i>
Program Budget:	<i>USD 431.35 million (Birr 8.454 billion)</i>
Budget Allocation:	<i>70% for R-WaSH , 20% U-WaSH , 10% Program Support</i>

1.2. OWNP-CWA Program Development Objective

The Program’s Development objective is to improve the health and well-being of communities in rural and urban areas in an equitable and sustainable manner by increasing access to water supply and sanitation and adoption of good hygiene practices. The intermediate objectives of the program are directed towards attaining:

- GTP targets of 98% and 100% access to safe water supply for rural and urban areas respectively
- Access to basic sanitation to all Ethiopians having.
- 77% of the population practicing hand washing at critical times, safe water handling and water treatment at home, and
- 80% of communities in the country achieving open defecation free (ODF) status.

1.3. Program Components

The OWNP has mainly four components:

1. Rural WaSH,
2. Urban WaSH,
3. Institutional WaSH and
4. Program Management and Capacity Building.

Program Operational Manual (POM) is developed to serve as a main guiding document for both the Government of Ethiopia (GoE) and the Development Partners who would be pooling their funds into the Consolidated WaSH account to implement part of the OWNP. The development partners contribution as outlined in the WIF will be channeled to the CWA.

1.4. The Program Beneficiaries

The program aims to provide access to improved water supply and sanitation services for a total of 5.9 million people. This includes expected beneficiary numbers from a total of 10,360 institutional WaSH facilities (water supply and Latrines) that the program plans to construct and rehabilitate.

The primary Program beneficiaries are rural and urban residents in participating Woredas/towns and communities in Ethiopia. The Program will provide benefits in the form of improved water supply service and sanitation and hygiene education to rural and urban communities,

Regional WaSH Technical Team in consultation with their Regional Administration will determine how to phase Woreda participation since not all can be assisted simultaneously. Un-served people, who in most cases represent the poorest and most vulnerable, and institutions will be particularly targeted and will receive greater priority than those who already have a basic level of service.

To ensure that the Program benefits the most disadvantaged, an appropriate targeting approach that includes:

- I. level of service coverage based on the results of the NWI;
- II. maintaining geographic balance;
- III. proportion of unserved population;
- IV. presence of ongoing assistance in the woreda or town;
- V. implementation readiness expressed by commitments from participating woredas, communities, and towns; and
- VI. Compliance with the Bank’s safeguards requirements, and meeting initial screenings; is to be used.

While these are general criteria to be used by the Program, each region can include additional criteria to fit its specific regional contexts.

Table 2- National WaSH Program CWA selected woredas and small towns

S.No.	Regions	No. Woredas	No. Small Towns*

1.5. Allocation of budget

1.5.1. Program Components and Outputs through CWA Financing

The components and outputs of the OWNPN that will be supported through the CWA over a five year period (July 2014 –June 2019) from funding received from the AfDB, DFID, UNICEF, the WB and 10% contribution from the GoE to the CWA with indicative earmarked allocations are provided in Table .

Table 3 - Estimated cost of Program Components and expected Outputs

No.	Component name	Total Est. cost (mill USD)	Financing from million USD)					Component Outputs
			AfDB	DFID	GOE	UNICEF	WB	
A	Rural WaSH	235.1	59.5	69.8	23.8		82	17,915 new water supply schemes constructed and 6,312 facilities rehabilitated 687,950 new household sanitation facilities built through promotion carried out under the program.
B	Urban	129.7	-	32.9	11.8	-	85	115 town water supplies improved 115 towns will have improved sanitation facilities in low income areas and public latrines and/or septage management system.
C	Institutional WaSH	84.5	19.6	19.7	7.2	10	28	1,220 new and rehabilitated water supply facilities for health centers/posts 3,600 new and rehabilitated water supply facilities for schools 2,225 new and rehabilitated sanitation facilities for health centers/posts, gender segregated 3,335 new and rehabilitated sanitation facilities for schools (stance/student ratio -1:50), gender segregated
D	Program Management and Capacity Building	35.7	13.0	9.2	3.5	-	10	Over 24,225 new legal WaSHCOs (with 50% women members) 90% consolidated reports prepared at KWT, WWT, RWCO and NWCO levels on a monthly, quarterly and annual basis 70% of total) schools teaching hygiene and sanitation using new curriculum 7,835 woreda/zonal/regional /town staff trained (by gender) in relevant skills 16 TVETCs/HSCs supported to offer WaSH courses
	Total	485.0	92.1	131.6	46.3	10.0	205.0	

Note: - financing from government is estimated contribution from the urban and rural beneficiaries

10.	Total Budget	431,353,672	8,454,618,242
86% of the total budget is allocated for regions			7,215,804,507

From the total budget of 8,454,618,241.93 birr 86% is allocated to regions

Table 5- Budget Allocation for regional sector bureaus in percentage

Description	Regional Water Supply	Regional H&S/ health facilities	Regional Hygiene/school facilities	Bureau of Finance	Total Regional Allocated budget
Total Allocate	5,115,034,369	1,203,084,610	847,550,610	50,134,918	7,215,804,507
Allocation in %	70%	17%	12%	1%	100%

1.6. Reporting Period

The reporting period of the program is from July/2006 –June/2007 EFY

2. Part Two. Program management and capacity building

The program management and capacity building is one of the three major components defined on the POM. This component aims to support and build the capacity of WaSH agencies at federal, regional, and local government levels to plan, implement, and manage water supply and sanitation services under their jurisdiction. A total of about \$35.7 million is allocated for this component.

2.1. Program Coordination

The Program Guidance, Oversight and Coordination at all levels is important for the proper implementation of the program as the program is a coordinated effort of the Water, Education, Health and Finance Sectors both at Federal, Regional and Woreda level. In accordance with this, a *National WaSH Steering Committee (NWSC)* is established and is chaired by the minister of MoWIE. Members of the NWSC are state ministers of the three WaSH sector ministries, MoFED and Director for WRDF. The committee is providing guidance for the proper functioning of the M&E of the program, the establishment and functioning of WaSH structures at all levels. In view of this, the National WaSH Steering committee has reviewed and endorsed the 2007 OWNP-CWA Consolidated Annual WaSH Plans and National Capacity Building Package.

At region level, all program supported regions have similarly established *Regional WaSH Steering Committees* and are providing guidance to regional WaSH sector bureaus. In most of the regions the Heads of Bureau of water are chairing the RWSC.

The National WaSH Coordination Office is based at MoWIE and is coordinating the four sector ministries. Accordingly, the office was engaged in the preparation and consolidation of Strategic and Annual Work Plans and reports, organizing Joint start up and review missions (December, 2014 joint start up mission and preparation for the July, 2015 progress review mission) in collaboration with development partners. In coordination with MoFED, the NWCO was also engaged in preparation of staffing package for Federal and Regional WaSH sectors. The office has also organized program launching and familiarization workshop inviting all program implementing structures and CWA development partners. Establishment of the RWCO regions differs from region to region. Most of the regional String Committees have delegated the water sector PMUs to take the responsibilities of the program coordination, on top of their regular duties and responsibilities while Tigray, DireDawa, Harrari and Somali regions have reported to assign a regional WaSH coordinator.

Administrative bodies at woreda level also play crucial role in the implementation of the program. Accordingly all regions have established *Woreda WaSH Teams*. All WWTs are aware of the program and have started implementation of the program.

With regards to program implementation support to Medium towns, the coordination and management arrangement is by WRDF and the programme is coordinated by the Project Monitoring and Evaluation Core Process of the Water Resources Development Fund Office. Table ... summarizes the summary of establishment and functionality of coordination structures at all levels.

One WASH National Program – CWA 2007 Annual Report

2.2. Strategic and annual planning

2008 Annul planning: One WaSH National Program Consolidated WaSH Account 2008 annual plan and budget was presented to MoFED to be proclaimed by each sector Ministries (MoWIE, MoH, and MoE). Accordingly, the 2008 budget is proclaimed by sector ministries for the first time which can be taken as a great achievement for the sector. The 2008 EFY budget ceiling is also prepared by NWCO. The ceiling was then communicated with all WaSH sectors' (Federal and Region). Accordingly all regions have completed preparation of their respective physical and financial plan and have sent the document to the NWCO for consolidation. The NWCO has organized eight days consolidation program at Adama by bringing a team of experts form MoWIE, MoE, MoH and MoFED and conducted the consolidation of regional physical and financial plan for 2008. Currently, at NWCO level rectification of the plan is being exercised and is expected to be finalized and officially approved by the steering committee before end of August 2015.

2.3. Staffing and logistics

2.3.1. Staffing

Staffing at Federal WaSH PMUs A staffing plan package of the program for Federal and regional WaSH implementing structures and Regional BoFEDs sectors is prepared by the NWCO and was approved by MoFED. In accordance with the approved staffing plan, the Federal Water Education and Health WaSH sector PMUs have deployed the critical positions. Out of the approved 37 positions for the Federal Water PMU, 34 staffs are so far deployed. For MoH and MoE, in addition to the assigned permanent focal person to coordinate the PMU, the PMUs have hired two staffs each out of their approved three.

Staffing at regional WaSH PMUs: - PMUs in all regions are also progressing well in deploying their required professionals. In most of the region's major key staffs at Regional Water Bureau (regional PMU coordinators, Procurement specialists, Rural and Urban Technical specialists, Contract Management Specialists, Financial specialists and M&E specialists) are onboard. 27 staffs were approved for Amhara, Oromia and SNNP regions. Accordingly, the regions have so far filled 78%, 74% and 52% of the required staffs respectively. With regards to Tigray, Afar, and Somali regions their approved staff number was 19 each and have succeed in filling on 95%, 63% and 95% respectively. For Harrar, Gambella, Benshangul Gumuz and Dire Dawa the approved staffs were 13 and the filled positions were 85%, 85%, 15% and 15% respectively. For the case of Gambella, the region has decided to assign its permanent staffs for the program implementation instead of hiring new contract staffs. Accordingly, currently 11 staffs are assigned.

With regards to Regional Health Bureaus, while Tigray, SNNP, Amhara, Afar, Harari, DD and Somali regions have made quite good progress in filling their approved staffing positions B/Gumuz, Gambella and Oromia regions are on recruitment processes. For Regional Education Bureau Staffing is approved for four regions (Oromiya, Amhara, Tigray & SNNPR). So far SNNP region has deployed the required two specialists while the others are under recruitment process. All unfilled positions are expected to be filled before September, 2015. With regards to Regional Finance Bureau the two financial management specialists approved by MoFED are deployed in all the regions. ***Please see annex 3 for more detail on staffing.*** Despite the staffing package does not consider the WRDF staff requirement, in discussion with MoFED, the WRDF is in the process of recruiting five contract staffs for the program administration of the 20 medium towns.

2.3.2. Logistics

In all regions including federal WaSH sectors the Program Implementation and coordination units are functioning in a conducive working environment with respect to office, office equipment's and furniture. Major gaps in this regard are lack of field vehicles and Motor bicycles both at regional and zone level. This has constrained implementing regions in their proper and regular implementation support to the widely disbursed program woredas and small towns. To address this issue the PMU at the MoWIE is processing bulk procurement for both the vehicles and Motorbikes. Currently the procurement of Motorbike is under bid evaluation process. However, the procurement for vehicles has been rebid due to lack of responsive bidders and the rebid will be opened on August 4, 2014. To address this issue the PMU at the MoWIE is processing bulk procurement for the above mentioned items.

One WASH National Program – CWA 2007 Annual Report

2.4. Capacity building and program awareness

Capacity building is one of the major components of the Program which contributes for the sustainability of constructed and rehabilitated/expanded water supply schemes both in rural areas and urban centers. As this year was the launching year of the program, all Federal and regional WaSH sectors were engaged in organizing an intensive program awareness and familiarization workshops where considerable level of presentations were delivered during program launching workshop. Accordingly, it was managed to aware more than 2700 workshop participants in all regions and program Woredas and towns. Audience of the workshop were Regional WaSH steering and Technical committee members, Federal, Regional, Zonal and Woreda of WaSH implementing structures (Water, Education, Health and Finance), Town water boards and Mayors, Woreda WaSH teams etc. Maximum effort was made to enable the participants understand core issues of program objectives, roles and responsibilities of each partners, social and environmental safeguard issues, budget management, planning, monitoring and information exchange during the event. In addition, at woreda level 19,110 (11,464 male and 7,646 female) WaSHCO members were given program awareness and scheme management capacity building trainings.

With regards to technical trainings, in 2007 EFY the federal and regional PMUs have conducted trainings for Federal, regional, Zone and Woreda WaSH personnel's engaged in the Program. During the reporting period a total of more than 6800 WaSH staffs at federal and regional level have received different technical trainings (12 staffs attended abroad trainings while the remaining attended local trainings). The trainings given include Advance goods and equipment's procurement, Advanced Works and selection of Consultants, Advanced financial management for donor funded project, Comprehensive safeguards (Environmental and social) training, FM Consultative work shop (By MoFED), Contract administration, construction management, design of small and medium towns, small scale technology options, WaSH MIS, School Hygiene and sanitation, water quality management. In all regions and federal sector PMUs trainings were planned for financial management specialists on the Financial Management Manual. However, due to the delay in the preparation of Financial and Procurement Manuals (the source materials for the training) the training was not conducted.

To strengthen the implementation capacity of the WaSH sectors both at federal and regional level a comprehensive capacity building package is prepared and approved by the steering committee. The package focus on capacity building on Planning , implementation, monitoring , evaluation, reporting , Contract management & construction supervision , safeguards, Water Quality Monitoring and experience exchange for international lessons and experience through participating in international events , conferences and exposure visits. The package is now communicated to the Development partners for further comments and clearance.

However, with an unfortunate lag of deployment of WWCs, the tasks of capacity building both at program implementation and community level were pushed to the coming year. So far all regions are on the process of procurement. Expected completion of the procurement is scheduled for September, 2015.

One WASH National Program – CWA 2007 Annual Report

3. Part Three. Component description, targets and detail status

To achieve its development objectives, the program finances three broad components, the Rural WaSH component, the Urban WaSH component and the Program Management and Capacity Building component. Each of the first two program components are further divided into different sub-components to address the Water supply, the sanitation and the hygiene perspectives at both household/community and institution level.

3.1. Rural WaSH

3.1.1. Component Description and expected targets

This component aims to improve access to safe water supply and sanitation services, and to promote improved hygiene practice in rural areas of selected woredas at both community and institution (health facility and schools) level. The community WaSH aspect of this component is further divided in to two sub components, the water supply service and the sanitation and hygiene promotion. The institutional WaSH component has also two major sub components; the schools WaSH and WaSH for Health Facilities. Under the R-WaSH component, the program targets to provide access to water supply and sanitation to a total population of about 3.8 million and 3 million respectively. This includes expected beneficiary numbers from a total of 10,360 institutional WaSH facilities (water supply and Latrines) that the program plans to construct and rehabilitate.

The total allocated budget for the rural WaSH component of the program is \$319.6 million, out of which 73.5% goes to rural community WaSH while the remaining 26.5% goes to rural institutional WaSH. In parallel with working on establishing proven system of community financing through the government financial system, Woreda Managed Project (including region managed projects) on behalf of the community are identified as alternative options for rural WaSH implementation.

The R-WaSH component will specifically support the creation of sustainable rural water supply, sanitation and hygiene through activities such as: (i) the construction and rehabilitation of community water supply schemes (ii) construction and rehabilitation of institutional water and sanitation facilities in schools and health facilities (iii) capacity building to strengthen and sustain the capacity of beneficiary woredas to effectively plan, implement and manage their R-WaSH; (iv) capacity building to strengthen and sustain the capacity of beneficiary communities to effectively operate their water supply and sanitation facilities; and (v) capacity building for respective water, health, and education regional bureaus and woreda offices to create a critical mass of well-trained and skilled facilitators to mobilize communities for behavior change and demand creation to sustain the impact of these changes.

The following table summarizes the component’s expected outputs and estimated costs

Table 9- Summary of Rural Component output

No.	Component name	Total Est. cost (million USD)	Component Outputs
A	Rural Community WaSH	235.1	<ul style="list-style-type: none"> 17,915 new water supply schemes constructed and 6,312 facilities rehabilitated 687,950 new household sanitation facilities built through promotion carried out under the program.
B	Rural Institutional WaSH	84.5	<ul style="list-style-type: none"> 1,220 new and rehabilitated water supply facilities for health centers/posts 3,600 new and rehabilitated water supply facilities for schools 2,225 new and rehabilitated sanitation facilities for health centers/posts, gender segregated 3,335 new and rehabilitated sanitation facilities for schools (stance/student ratio -1:50), gender segregated

See detail of allocation of budget to the component (Program life and reporting year) in part Six Disbursement and utilization of fund.

3.1.2. Implementation progress

A. Rural Community WaSH

i. Rural Community Water Supply

In 2007 EC it was planned to i) complete 1514 study and design of Rural Water supply system and schemes , ii) construct about 8352 new rural water supply schemes and iii) rehabilitate 467 non-functional schemes. Accordingly, at the end of EFY 2007, it was managed to complete 1462 study and designs which against its plan shows a performance of about 96.5 %. Lion share of this performance goes to Tigray and Oromia regions contributing about 69% and 23% of the total performance, respectively. Amhara, Harari, Dire Dawa and Afar regions contribute the remaining 5%.

With regards to construction of new rural water supply schemes, at the end of the year a cumulative of 5478 schemes are completed. Of the total, 2061 are HDW, 1774 are spring on spots, 916 are shallow wells, 48 are deep boreholes, 533 are community rope pumps, 15 are RPSs and 131 are springs with distribution. Against the year plan the total performance is about 64.1%. In relation with rehabilitation of nonfunctional water supply schemes, out of the planned 467 for the year, 106 existing WS schemes have been rehabilitated (24 in Tigray, 53 in Gambella and 29 in Diredawa). In addition, 7 expansions from existing schemes (2 in Tigray, 3 in SNNP and 2 in Diredawa) were also completed.

In general, at the end of EFY 2007 a total of 5591 Water supply schemes are completed and 1044 schemes are under different stages of construction. The following graph demonstrates region specific WS scheme completion status for the year EFY 2007.

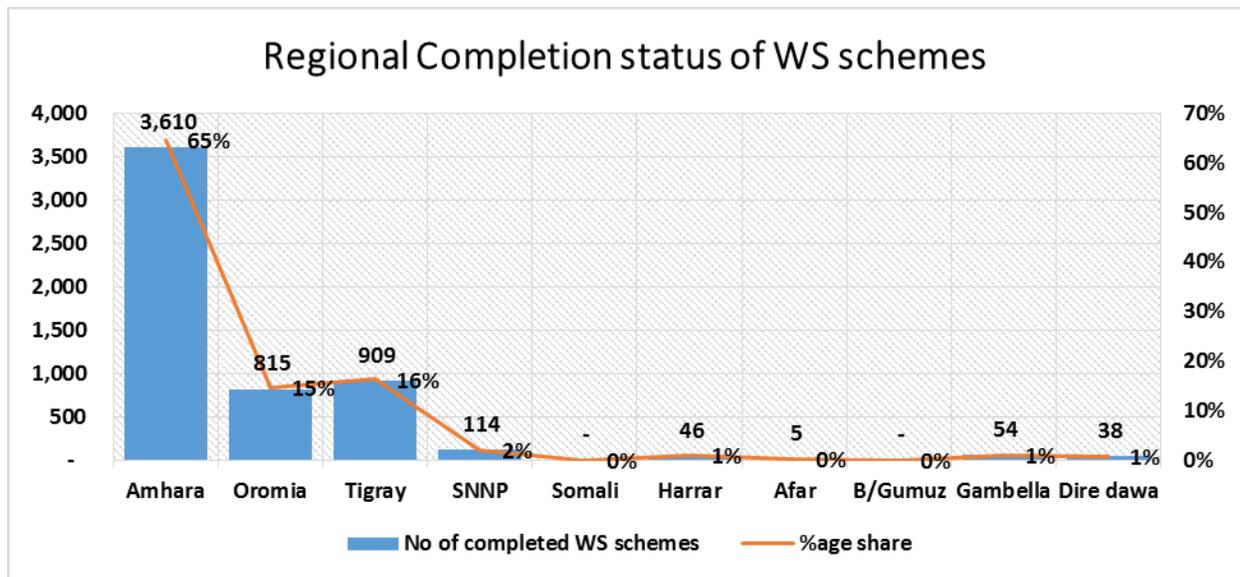

Fig 1- Completed water schemes by region.

From the completed schemes access to water supply is created to about 1.42 million people in the country. This, compared to the targeted 3.8 million people in the program life, shows a percentage progress of about 37% which indicates that the program is on track towards achieving its set forth results. The graph below illustrates the number of beneficiaries with respect to regions.

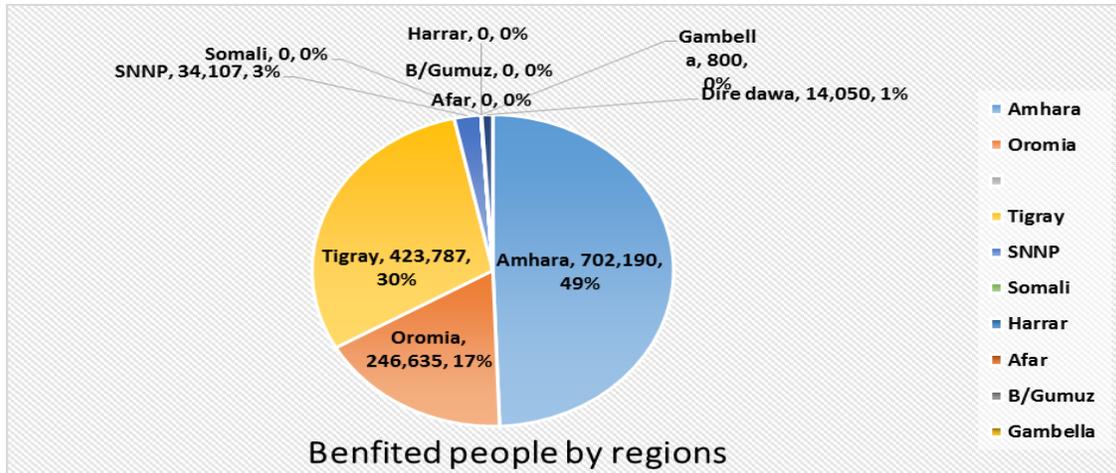

Fig 2- Benefited people by region

ii. Rural Community Sanitation and Hygiene

In 2007 EC it was planned to conduct community sanitation and hygiene trainings and awareness creations and enable the communities to i) construct 1.07 million new improved HH latrines, ii) upgrade 95,791 unimproved HH latrines to improved HH latrines and iii) construct 1.22 million hand washing facilities. In this regard, awareness creation campaigns at all levels were delivered and accordingly it was managed to construct 18,120 new improved HH latrines, upgrade 7277 un improved latrines and construct 34,267 hand washing facilities. Compared with the cumulative plan these performance are 2%, 8% and 3% respectively. Although the performance against the plan is low, quite a good achievement is observed in terms of beneficiaries. As a result of the completed activities, a total population of about 169,270 has benefited from getting access to improved sanitation facility. In addition 147,335 populations have also benefited from the completed hand washing facilities. All the achievements on rural community sanitation and hygiene are from Amara region.

B. Rural Institutional WaSH

- i. **School WaSH:** With respect to school water supply, for 2007 EFY, construction of 338 new water supply facilities and rehabilitation of 6 water supply facilities were planned to be implemented. Accordingly, at the end of the fiscal year, a total of 159 school water supply facilities are managed to pass the procurement process and enter in to contractual agreements. Out of these 16 are completed and the remaining 143 are found at different stages of construction. Regarding school sanitation facilities the plan for 2007 EFY was construction of 573 new improved latrines and upgrading of 7 unimproved latrines to improved latrines. In addition it was also planned to construct 37 new school hand washing facilities and to rehabilitate three existing HW facilities. Accordingly, at the end of EFY 2007, about 220 new improved school latrines, 4 school latrine rehabilitations and 13 new school hand washing facilities are under construction

One WASH National Program – CWA 2007 Annual Report

- ii. **WaSH for Health Facilities:** Out of planned 140 new water supply facilities for health facilities 5 are completed while about 81 are under different stages of construction. Although it was not planned in EFY 2007 plan, Somali and Amhara regions have managed to complete rehabilitation of 16 and 2 health facility water supply facilities respectively. Construction of improved Health facility latrines and rehabilitation of existing for 253 Health facilities was planned. Accordingly, Amhara region has completed for about 88 health facilities and the other regions are under construction for about 169. With regards to construction of new waste disposal facilities (Incinerators, placenta pits), out of the planned 142, about 24 are managed to be completed and 38 are under different stages of construction. Construction and rehabilitation of 91 health facility hand washing facilities are also completed in EFY 2007.

In general, in 2007 EFY promising progress on community WSS is observed. Accordingly, for construction of new WS facilities it was able to progress about 30% of the total program life target. The figure below shows the 2007 achievements on R WaSH against the program life target on key component activities.

Fig. 3- Rural Wash 2007 progress

The following table illustrates and summarizes the physical activity progress of the Rural WaSH component of the program. It also shows the results obtained in terms of beneficiary number.

One WASH National Program – CWA 2007 Annual Report

One WASH National Program – CWA 2007 Annual Report

3.2. Urban Water Supply, Sanitation and Hygiene (U-WaSH):

3.2.1. Component description and targets:

The Urban Water Supply, Sanitation and Hygiene component of the program aims to improve access to water supply and sanitation services in urban areas (small and medium towns), and to strengthen the capacity of WaSH officials to plan and manage these services in a sustainable manner. The total allocated budget for the urban WaSH component of the program is \$129.7 million. The total number of Towns supported by the program is 124 small towns and 20 medium towns. The program implementation management for the medium towns is undertaken by the WRDF. The component is further divided into two sub components namely, the urban water supply services and the sanitation services including hygiene Promotion, construction of communal and public toilet facilities and improvement in liquid waste management services and sanitation facilities construction for institutions and low income communities.

The following activities are supported under this component.

- ✓ Rehabilitation and reconstruction of urban water production, treatment, and distribution systems;
- ✓ Preparation of a National Urban Sanitation Strategy, supporting studies on urban sanitation, and priority sanitation investments in beneficiary towns;
- ✓ Activities to strengthen the capacity of participating water boards/committees and operators to effectively manage their water supply and sanitation facilities; and
- ✓ Activities to support preparation of follow up interventions in urban areas (including sub sector technical, institutional and financial assessments, and feasibility studies in selected urban areas as well as look at potentials for public private partnership arrangements).

The following table summarizes the component’s expected outputs and estimated costs

Table 11- Urban component output

No.	Component name	Total Est. cost (million USD)	Component Outputs
B	Urban	129.7	115 town water supplies improved 115 towns will have improved sanitation facilities in low income areas and public latrines and/or septage management system.

3.2.2. Urban Small Town WaSH Implementation Progress

Preparatory activities for the urban WaSH component of the program are started in all the 144 (124 small and 20 medium) towns. Majority of the towns have complete study and design documents that are currently under review and expected to proceed with the procurement process for works contracts. The establishment of Water Works Design Enterprises in all the regions has helped a lot in having feasibility and design reports ready on the shelf in each regional Bureau of Water.

During the end of the financial year a total of 86 small towns have completed study and design reviews. For small town water supply management, so far 15 water utilities, 37 water boards and 12 urban water committees are established (subject to data verification and correction in subsequent reports). See the following table for details.

One WASH National Program – CWA 2007 Annual Report

Table 12- Small towns' administration status

9	Harari	-						
10	DireDawa	-						
Total		124	15	37	12	-	86	-

Construction of urban water supply schemes has also commenced in more than 87 small towns. Out of the planned 102 new water supply scheme construction, so far, drilling of 21 Bore holes (in Tigray) is completed. In addition, procurement process for construction of 34 water supply schemes is progressing in Amhara, Oromia, Tigray and Gambella regions and for 2 towns contract is signed. A total of about 30 urban water supply schemes are under different stage of construction where 3 of them are between 50-75% and 27 are below 50%. Rehabilitation of water facilities in 28 small towns' health facilities is also reported to be completed while construction for four new water facilities is under progress.

With regards to urban sanitation, 6 public latrines in Tigray region are constructed and 12 communal latrines are under construction. In addition about 9 health facility latrines are also under different stages of construction.

3.2.3. Urban Medium Towns General Implementation Status

The procurement plan of twelve medium town schemes (10 in Oromiya, Abid Adi in Tigray and Gambela town) have been reviewed and cleared by the WB paving the way for the next phase of procurement activities. In general out of the 20 medium towns managed by the WRDF, 5 towns are under study and design, 6 towns are under appraisal, 5 towns are under different stage of procurement and one town is under construction.

Similarly the recruitment and deployment of Town WaSH Consultant (TWC) teams is at different stage in different regions. It is expected that all this preparatory activities will be finalized in the next three months and by September 2015 most of the urban WaSH activities will advance to works contracts. The following table shows the status for each of the medium towns.

Table 14- Medium Towns General Implementation Status

4. Part Four. Works, goods and service procurements and contract management

4.1 Implementation status of Procurements

Procurement Plan Revision: All regions have completed and submitted the procurement plan for 2008 EFY on time. The PP was discussed and endorsed by the regional WaSH Steering Committee. Currently compilation and review of the submitted PPRs is being exercised at MoWIE.

Staffing: At federal MoWIE six procurement specialists have been deployed and recruitment for one contract management specialist is under way. For filling the required approved procurement specialists and contract management specialists, all regions are at different stage of recruitment processes. While, Amhara, Somalia and Afar regions have deployed all the required positions, Gambella, Harrar and Dire Dawa regions have not recruited the approved specialists. For the case of Gambella region, the region has assigned the required experts from its permanent staffs. 75% of the required staffs are filled for Tigray region and about 33% are filled for Oromia region. For B/Gumuz and SNNP regions about 50 % of the approved procurement and contract management staffs are filled. All regions are expected to fill their required positions before end of September, 2015. The following figure explains the overall staffing condition at federal and regional levels.

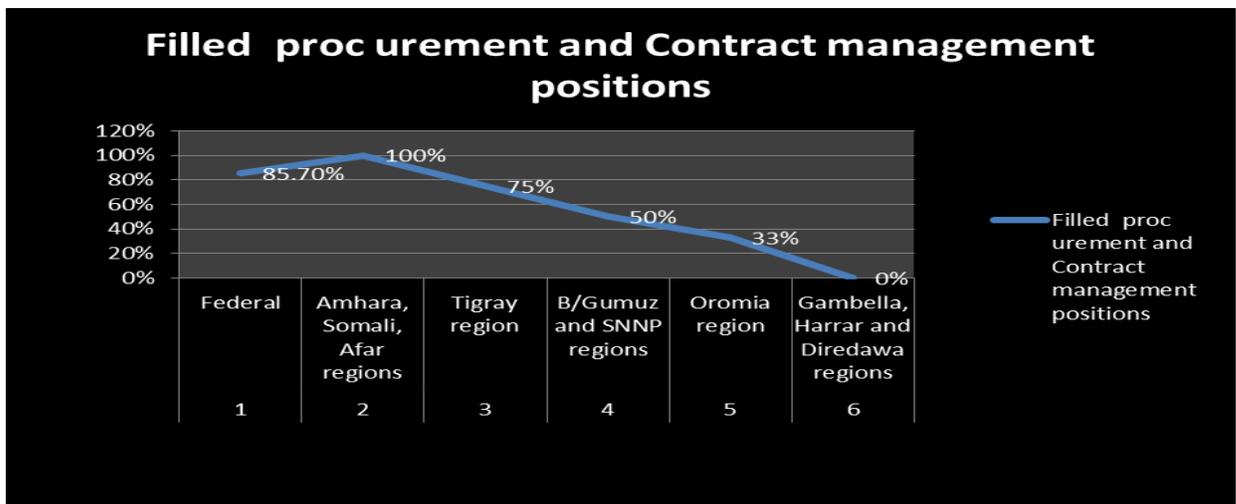

Fig. 4- Available procurement and contract management staffs

a. Procurement of Works

Based on the submitted reports of regions, different works procurements for construction of 4351 community and institution water supply schemes were processed in 2007 EFY. The types of procurements include procurement of construction of DWs, SWs, RPSs, HDWs, SPDs and Small and medium town water supplies. Accordingly, it was managed to complete the procurement process and sign contracts for about 92%.

With regards to sanitation facilities, procurement for construction of community latrines, health facility latrines, public latrines and sanitation facilities at Health facilities and schools were handled and accordingly about 80% of the procurements were completed.

One WASH National Program – CWA 2007 Annual Report

b. Procurement of Goods

All regions have managed to procure the required office furniture's and equipment's. Procurement of Electro mechanical equipment's (dewatering pumps, generators and hand pumps), procurement of laboratory equipment's and water quality test kits, procurement of different O&M tools and materials, procurement of pipe and fittings, surface centrifugal Pump, Submersible Pump etc... were also progressing in EFY 2007.

The other major procurement that was planned in 2007 FY was the procurement of vehicles (55 pickup and 2 station wagons) and 1530 motor bicycles which was managed by the MoWIR. The procurement was noticeably delayed due to different reasons such as lack of responsive bidders. For the vehicles the procurement was rebid and was floated for the second time. The bid was opened on August 04, 2015 and is now under technical evaluation. The motor bicycles procurement has reached the stage of financial evaluation.

c. Procurement of Consultancy

The selection and employment of Woreda WaSH Consultants (WWC) and Town WaSH Consultants (TWC), to provide support to the Woredas and towns was one of the major procurement planned under the consultancy category. However, the procurement is not going according to the planned schedule. All the regions are at different stages of procurement and are expected to finalize before end of September. The delay was mainly due to lengthy no objection and clearance process from the MoWIE side and due to limited regional capacity in submission of quality documents. This delay has also caused lower implementation progress in most of the regions.

Table 15 - Summary of Implementation status of Procurements

No	Category of procurement	Type of Procurements	Total No	Procurement status				
				Completed		Under process		
				No	Name of regions	No	Name of regions	
1	Works	Community and Institution Water supply	Procurement for construction of DW	175	70	Tigray and Oromia	105	Oromia, SNNP, Tigray and Afar

4.2 Implementation status of W,G and S Contract

During the reporting period, regions were requested to submit their contract register reports and accordingly some of the regions have submitted their reports while most of the regions are under preparation. The procurement team at MoWIE is supporting the regions in their preparation process. All regions are expected to submit their contract register reports before mid of September and the compilation is expected to be completed before end of September. Accordingly, updated report on contract register will be submitted in the next reporting period. However, based on the submitted annual 2007 regional report, although it is not complete, it was managed to summarize the contract management section. Annex seven shows the detail.

One WASH National Program – CWA 2007 Annual Report

5. Part Five. Monitoring and Evaluation

5.1 Staffing:

All program implementing and coordination structures at federal level have deployed the approved Monitoring and evaluation specialists. Accordingly, four M&E specialists are found at federal WaSH sector Ministries. While MoH and MoE have deployed one specialist for each of them, MOWIE has assigned two M&E specialists. The approved one M&E specialist for the NWCO is currently under recruitment process.

With regards to regions, MoFED has approved one M&E specialists for each of the regional Water PMUs. Six of the ten regional Water PMUs, Amhara, SNNP, Oromia, Tigray, Afar and Somali regions, have deployed the required specialist while the remaining three regions (B/ Gumuz, Dire Dawa, Harari) have not yet assigned/recruited. Gambella region has filled the gap by assigning from its permanent staffs. With regards to the regional Health sectors, out of the four regions required to hire M&E specialist Tigray SNNP and Amhara regions have assigned M&E specialist. Oromia region is on process for filling the position at both regional Health and Education sectors.

5.2 Regular program progress reporting:

Every Quarter, the RWCO is expected to compile and prepare a CWA program performance reports (financial and physical) and submit to the NWCO. In addition, sector specific reports are also required to be produced by MoWIE, MoE, MoH, MoFED at federal level based on reports submitted from their respective regional bureaus and are also expected to be submitted to the NWCO on regular bases.

However, the absence of a clear reporting guideline and format has hindered all regions and the NWCO to produce regular quarterly progress reports. As a result, to guide the requirement of the POM and for consistence and clear reporting of the program, the NWCO in close communication with the development partners has developed a program implementation progress reporting guideline and format. The guideline illustrates on the reporting flow, schedule and formats for ensuring a regular, complete and reliable program progress reporting.

The prepared reporting guideline and format was distributed by the NWCO to all respective Ministries and regions requesting the preparation of the 2007 OWNP-CWA progress report. Accordingly, the reports were submitted to the NWCO, but with different level of completeness. During the course of EFY 2007 report preparation, the limited ownership and follow-up of all sector ministries at federal level have contributed a lot for the delay and incompleteness of received reports. As a result, the NWCO was forced to receive incomplete and delayed reports directly from the regions. This has caused additional burden to the NWCO in the compilation and refinement of the submitted documents. However, at the end, it was managed to produce a zero draft report to start the second July, 2015 joint implementation and support mission. To address the issues and challenges faced in the area of reporting, the NWCO in coordination with the development partners is currently planning to organize training on proper program progress reporting towards the end of September, 2015. The training will be organized to Federal and Regional WaSH sector implementers and will give attention to M&E specialists, regional WaSH coordinators and reporting focal persons.

5.3 Program Baseline data:

Collection of baseline data on selected WaSH indicators is necessary for measuring the program impacts at the end of the program. In this regard, in coordination with the CWA development partners a baseline data collection format was prepared by the NWCO and distributed to all regions. The baseline indicators address population,

One WASH National Program – CWA 2007 Annual Report

water supply and Sanitation access rates, number of Kebeles who declared ODF, number of schools and health facilities without water supply and without latrine and scheme non-functionality rates. Based on the format all regions have collected the required baseline information and have submitted to the NWCO. *(Please see Annex 5 to see the detail baseline data)*

5.4 Results Framework and Monitoring

Based on the Program Operational Manual and the recently developed reporting guideline a total of 23 result indicators are defined. Out of this 10 are PDO level indicators and the remaining 13 are intermediate indicators. The following table illustrates the summary of results obtained in 2007 EFY in accordance with the defined indicators.

One WASH National Program – CWA 2007 Annual Report

Table 16- Summary of Result frame work

PDO Statement:- The development objective of the program is to “increase access to improved water supply and sanitation services for residents in participating woredas, towns, and communities in Ethiopia”.

#	Indicator Name	Core	UoM	Baseline	End Target cumulative Yr 1-5	2014/15 target	Achievement on end of 2014/15	Remark
A	Project Development Objective Indicators							
1	Number of people in rural areas provided with access to Improved Water Sources under the program	x	Number	-	3,800,000	190,000	1,421,569	Rural Water Supply beneficiary number calculated based on the submitted 2007 EFY regional reports of completed rural water supply schemes (533 community Rope Pumps, 2061 Hand dug well with Pump, 1774 Spring On Spot and 916 Shallow wells) in Amhara, Oromia, Tigray, SNNP and Harrar regions. In addition, 131 springs with distribution from Amhara region is considered. Since the distribution for completed boreholes is not yet completed the 48 boreholes drilled in Oromia and Tigray are not considered.
2	Number of people in urban areas provided with access to Improved Water Sources under the Program	x	Number	-	2,160,000	-	-	21 deep boreholes in Tigray region are completed. However, the distribution system is not yet completed.
3	People provided with access to “improved sanitation facilities”- rural	x	Number	-	3,000,000	150,000	169,270	Beneficiary number for improved sanitation facilities”- in rural areas calculated based on the submitted reports from regions and the NWCO's 2007 EFY annual report (132,885 beneficiaries from new improved HH latrine and 36385 beneficiaries from upgrading of unimproved latrine to improved latrine in Amhara region)
4	Number of schools provided with access to “improved water facilities”-		Number	-	3,600	-	16	Calculated based on the submitted reports from regions and the NWCO's 2007 EFY annual report (16 new school water supply facility from Tigray)
5	Number of schools provided with access to “improved sanitation facilities”-		Number	-	3,335	-	-	
6	Number of health facilities provided with access to “improved water facilities”-		Number	-	1,220	-	51	Calculated based on the submitted reports from regions and the NWCO's 2007 EFY annual report (18 school water supply facility rehabilitation from Somali and Amhara and 5 new school water supply facility from Amhara regions in Rural areas and 28 rehabilitations in Somali in Urban areas)
7	Number of health facilities provided with access to “improved sanitation facilities”-		Number	-	2,225	-	112	Calculated based on the submitted reports from regions and the NWCO's 2007 EFY annual report 62 new (20 health facility latrines and 24 health facility waste disposal facilities; (Incinerators, placenta pits) and 68 rehabilitated from Amhara region
8	Number of HH that use latrine for defecation purpose properly		Number	-		-	927,018	Calculated based on the submitted reports from Amhara region
9	People provided with access to	x	Number	-			15,000	Calculated based on the submitted reports from Tigray region which shows

	“improved sanitation facilities”- Urban				150,000	7,500		completion of 6 public latrines. Average service standard for one public latrine is assumed at 2500 people. The standard is also taken from the region
10	Direct project beneficiaries (number), of which female (percentage)	x	Number	-	5,960,000	190,000	1,421,569	Calculated from the sum of DOI 1 beneficiaries and DOI 2 beneficiaries
			% female	-	50%	50%	0	
B	Intermediate Results Indicators							
	Component 1: Rural Water Supply, Sanitation and Hygiene							
1	Improved community water points constructed or rehabilitated under the program		Number	-	24,200	1,210	5,612	Calculated based on the submitted regional reports of completed rural water supply schemes 5591 schemes under rural WaSH (533 community Rope Pumps, 2061 Hand dug well with Pump, 1774 Spring On Spot and 916 Shallow wells, 131 spring with distribution, 15 RPS from spring source, 48 boreholes, 7 expansions and 106 rehabilitations) in Amhara, Oromia, Tigray, SNNP, Gambella, Dire Dawa, Harari and Afar regions) and 21 deep wells in Urban small towns from Tigray region.
2	Improved water supply schemes that are not functional in the program woredas		Percentage	25%	10%	22%		During the reporting period, due to lack of available information on the number of nonfunctional schemes, it was not able to update this indicator. This indicator will be updated in the subsequent reports.
			Number	-		-		
3	Woredas with prepared and approved RWSS programs and established WWTs.		Percentage	50%	70%	53%	100%	Calculated based on the 2007 annual regional reports. All regions have established WWTs in all the program woredas (89 in Amhara, 140 in Oromia, 26 in Tigray, 68 in SNNP, 28 in Somali, 11 in Afar, 6 in Gambella, 7 in B/Gumuz, 4 in Dire Dawa 4 and 3 in Harari)
4	People trained to improve hygiene behavior/sanitation practices under the project. (male/female)		Number	-	2,100,000	105,000	14,341	Calculated based on the submitted reports from regional 2007 EFY annual report. (4283 from Amhara, 1296 from Tigray, 7831 from SNNP, 533 from Somali, 319 from Harari, 97 from Afar)
5	Kebeles declared and verified ODF in the program woredas		Percentage	17%	80%	20%	-	
6	Improved latrines constructed under the project		Number	-	627,000	31,350	25,397	Calculated based on the submitted reports from regional 2007 EFY annual report (18120 new improved HH latrines and 7277 upgraded unimproved HH latrines to improved HH latrines in Amhara region)
7	Institutional WaSH facilities constructed/ rehabilitated in Schools and health facilities under the project		Number	-	10,380	518	242	Calculated based on the submitted regional 2007 EFY annual reports (16 new school water supply facility from Tigray, 18 school water supply facility rehabilitation from Somali and Amhara and 5 new school water supply facility from Amhara regions and 20 new health facility latrines and 24 health facility waste disposal facilities; (Incinerators, placenta pits) in Amhara 68 health facility rehabilitation and 91 sanitation facility hand washing facilities in Amhara region)
	Component II Urban Water Supply, Sanitation and Hygiene							
1	Water utilities that the program is supporting		Number	-	144	35	15	It was only Tigray and Somali regions that submitted their reports regarding this indicator. Accordingly the update is only for these two regions. Update on remaining regions will be provided on subsequent reports

One WASH National Program – CWA 2007 Annual Report

#	Indicator Name	Core	UoM	Baseline	End Target cumulative Yr 1-5	2014/15 target	Achievement on end of 2014/15	Remark
2	Additional Volume water produced from improved source under the project		M ³ /day	-	495,000	-	10,032	It was only Amhara region that submitted its reports regarding this indicator Accordingly the update is only for this region. Update on remaining regions will be provided on subsequent reports.
3	Participating towns that have established water boards and have business plans		Number	-	144	35	-	Amhara and Tigray regions have reported to establish 29 and 8 water boards respectively. However none of the water boards have prepared business plan
4	Public and Communal Latrines rehabilitated /constructed under the project		Number	-	450	135	6	Taken from Tigray region report.
Component III Project Management Monitoring and Evaluation								
1	Trained PMU staff at WaSH sector Ministries and their respective regions and program woredas (male/female)		Number	-	480	144	474	Calculated based on the submitted reports from region and the NWCO's 2007 EFY annual report (25 Amhara region, 134 Tigray region, 60 Somali region, 248 SNNP region, and MoWIE 116)
2	Trained WWT, WaSHCO/ Water Board members (male/female)		Number	-	7835	390	21,650	Calculated based on the submitted reports from region and the NWCO's 2007 EFY annual report (19,336 Amhara region, 300 Tigray region, 112 Somali region, 710SNNP region, 1012 Oromia region and 180 Harari region)

6. Part Six. Environmental and Social Safeguard Compliance

Staffing: At the federal level, MoWIE employed two environmental experts for the PMU under the Water Supply and Sanitation Directorate, with full responsibility to implement ESMF of the program. At the regional level: Oromia, Tigray, Afar, Somali, Gambella and SNNPR Water Bureaus have assigned one environmental expert each to ensure compliance with environmental safeguards. Regarding recruitment of social safeguard specialists, based on the MoFED staffing plan, regions like Somali, Afar and Tigray have deployed sociologists while SNNPR, Oromiya Amhara and Dire Dawa are at different stage of recruitment process.

Capacity building: Training on E&S safeguard was provided to Regional Water Bureau experts, including Regional Land Administration and Environmental Protection Bureau experts. Subsequently, Tigray and Oromia Regions have cascaded the training to their respective WaSH Woredas and Towns. The ESMF was communicated to all regions. To further improve the awareness of regions in this regard, towards the end of September, 2015 MoWIE in collaboration with the development partners is planning to organize a training program.

Environmental and social safeguard implementation: The understanding and attention given to the E&S safeguard element of the program has increased compared with the previous project (WSSP). All program regions and participating Woredas are showing good progress towards incorporating the E&S issues during program implementation. Amhara, Oromia and Tigray Regions are on the process of conducting Environmental and Social Screening (ESS) for their respective subprojects. However, because most of the remaining regions are under recruitment process for hiring environmental and social experts, significant progress in this regard is not observed,

One WASH National Program – CWA 2007 Annual Report

7. Part Seven. Disbursement and utilization of fund

Out of the total 8.45 billion birr program life budget, for 2007 EFY the National WaSH Steering Committee approved about 2.3 billion birr for the implementation of OWNPN CWA planned activities. Until the end of the fiscal year the development partners have transferred a total of about 1.2 billion birr. In addition to the donors transfer, there were community contributions of about 55.6 million from three regions (Oromia, Gambella and Harrari regions). Including the exchange rate gain of 12.5 million birr a total of 1.27 billion birr was made available for implementation of the program which is about 55.2% against the 2007 plan.

Prior to commencement of 2007 planned activities, on 13/06/006 PPA fund of about 114 million birr was transferred to regions and on December and January 2007 EC a total of 769 million 1st and 2nd disbursement of fund to program implementing bodies was made. The third disbursement with a total of 231 million birr was made towards the end of the fiscal year for three regions (Amhara, Tigray and Somali regions). Accordingly, including the PPA fund MoFED has transferred a total of about 1.14 billion birr to implementing bodies which compared to the donor's transfer is about 95%. **At the end of the fiscal year about 42% of the transferred amount which is about 463 million birr is reported to be utilized.** The following figure summarizes the overall utilization in terms of the funds planned and made available.

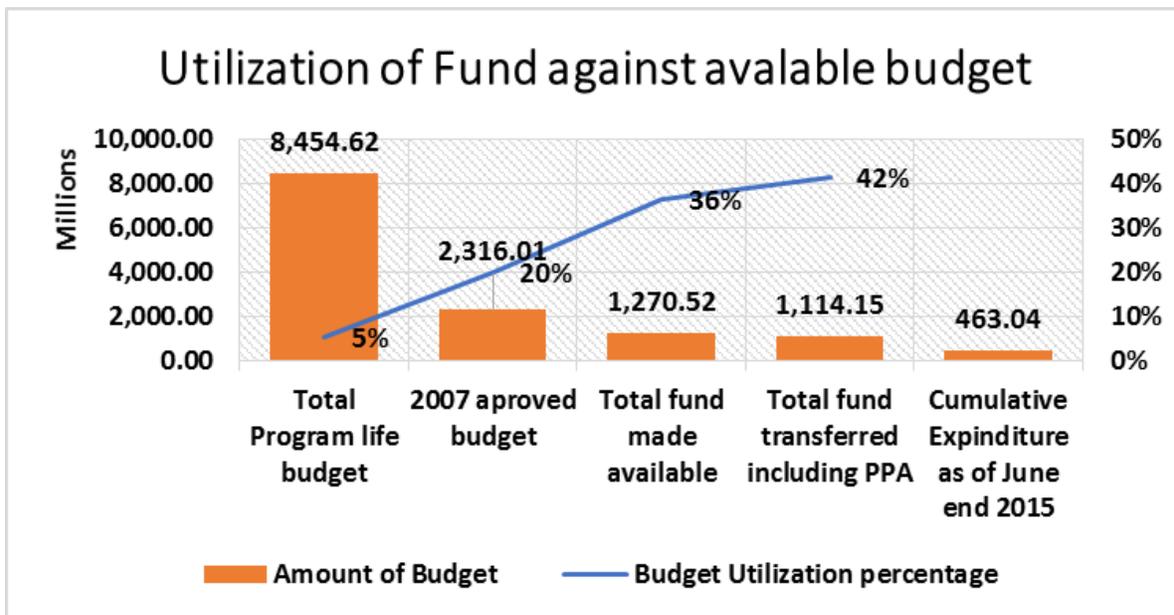

Fig 5. Utilization of fund against planned and transferred budget

In terms of program components the lion share of the budget utilization goes to the Rural WaSH component which accounts for about 79%. The remaining Urban WaSH and Program management components account for about 3% and 18% respectively as illustrated in the following pie chart.

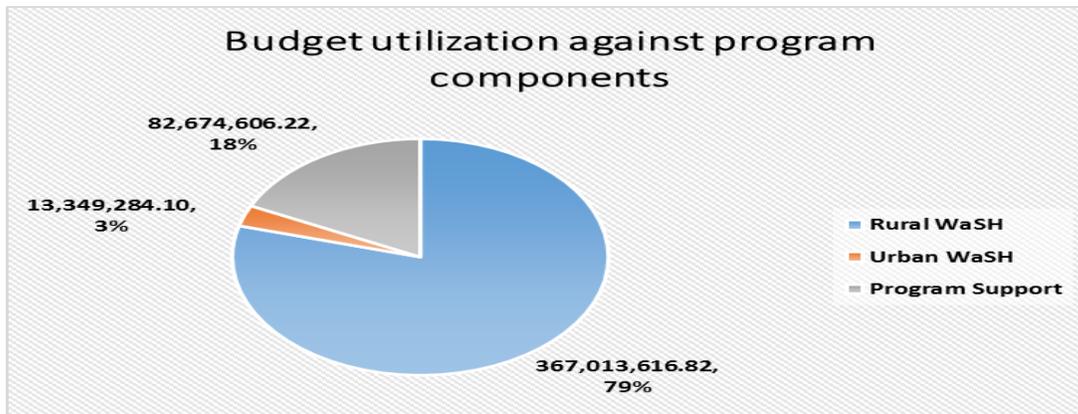

Fig 6. Budget utilization against program components

Relatively, when compared with the transferred budget to regions, better fund utilization was seen in Tigray, Amhara, Somali and Harrari regions. Exceptionally, the first three regions have made quite a good progress in utilization of their 1st and 2nd transferred budget and have also received the 3rd quarter disbursements. However, the utilization performance for the remaining regions is below 26% compared with the first two rounds of transfers.

One of the major reason for the low utilization performance was the late fund disbursement at all levels, which was made around January and February 2015. In addition to this, the delay in WWC and TWC procurements have also contributed much for the low budget utilization. For instance in SNNPR, Benshangul, and Afar regions, utilization of budge by the water PMUs is limited as they are waiting WWCs and TWCs to be deployed before commencing physical activities. The following table shows regional level budget utilization performance against the transferred amount.

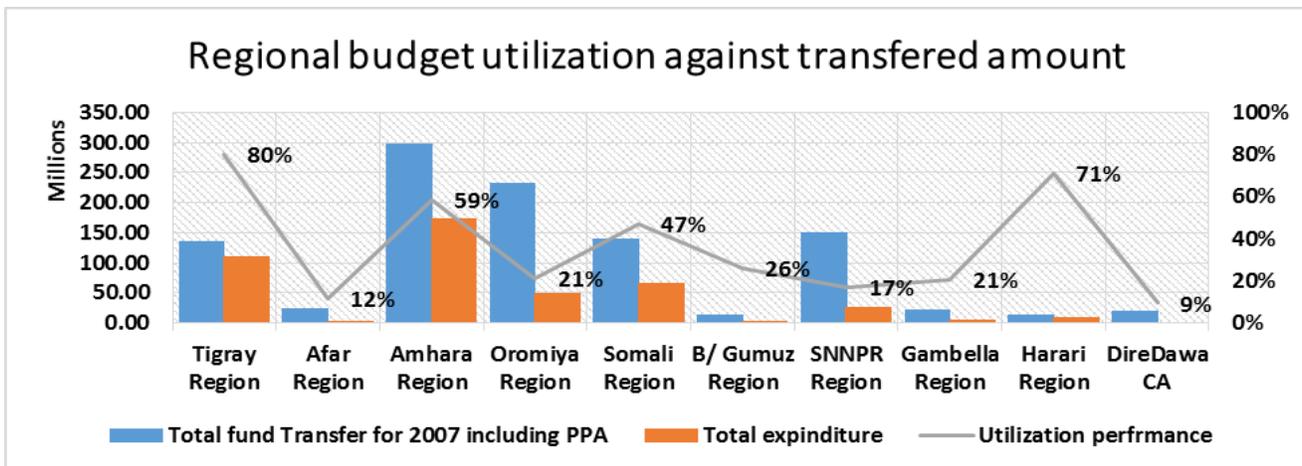

Fig 7. Regional budget utilization against transferred budget

With regards to Federal WaSH implementing bodies, out of the total 63.6 million birr transferred budget to the four WaSH sector ministries and WRDF a total of 14.9 million birr has been utilized. Compared with the transferred amount the performance is about 23.4%. The delay in bulk procurement of Vehicles and Motor

One WASH National Program – CWA 2007 Annual Report

Bicycles managed under MoWIE has contributed a lot for the low utilization performance. See the following figure.

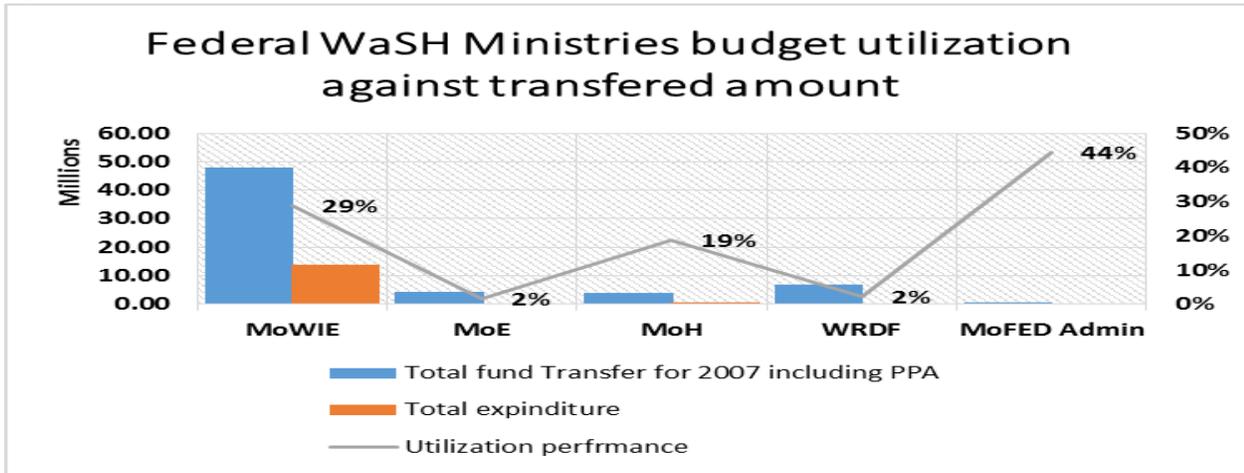

Fig 8 Federal WaSH implementing bodies fund utilization

The following tables summarize the matching fund status of medium towns and the overall financial condition of the program.

Table17 Matching fund status for Medium towns

No	List of medium towns	Source of financing			Utilized amount	
		CWA	Matching fund			
			Committed amount	Transferred amount	Remaining amount	
A.	WRDF Loan for construction					
1	Abiadi	15,687,213	6,722,787	-	6,722,787	
2	Boditi	58,640,000	19,560,000	-	19,560,000	
3	Dilla	78,671,986	78,671,986	-	78,671,986	
4	Finchaa	26,696,713	26,696,713	-	26,696,713	
5	Gobessa	28,553,469	7,138,367	-	7,138,367	
6	Robe	143,059,798	61,077,341	-	61,077,341	
7	Yabello	35,800,00	8,940,000	-	8,940,000	
B	Loan for Study and Design					
1	Legataffo	1,520,000	228,000	-	228,000	
	The other 7 towns namely Welliso, Sendafa, Bedeno, Hassaasa, Sawla, Bambisi and Sekota are under appraisal and as such the project cost is not yet determined.

One WASH National Program – CWA 2007 Annual Report

8. Part Eight. Outstanding Challenges and recommendations

The following bullet points are identified as the major challenges for the implementation of the program. Possible recommendations are also tried to be addressed for each of the identified challenges.

- Late disbursement of budget from Development partners to MoFED and from MoFED to regions which was effected in the middle of the fiscal year on December 2015. 1st and 2nd quarter budget was transferred to region during the beginning of the 3rd quarter. As a result, overall implementation of the program and budget utilization is low. To avoid this issue in the coming 2008 budget year the disbursement of budget from development partners and MoFED should be on time.
- Delay on Woreda WaSH consultant and Town WaSH consultant procurement was observed in all the regions due to lengthy no objection and clearance process from the MoWIE side and due to limited regional capacity in submission of quality documents. This delay has caused lower implementation progress in most of the regions as some of them are waiting for the consultants in order to have a joint implementation of physical activities and capacity building activities. In some regions like Tigray, Amhara and Oromiya although the consultants are not onboard they are trying to cover the gap by using their existing professionals. To address this issue all regions and MoWIE should work closely in expediting and finalizing the consultant procurement.
- Lack of logistics facilities especially in terms of transpiration was noted to be one of the major problems of all regions. Due to this the regions were not able to have the proper program follow up, supervision and implementation. Although there are efforts at the MoWIE to expedite the bulk procurement of vehicles, still the procurement is not finalized.
- The program coordination especially between WaSH sector bureaus at region level is not strong. In all the regions the Water sector has been assigned by the regional steering committees to take the responsibility of the regional coordination assignments. However, the support the water sector is getting from the health and education sectors is very limited. As a result, both at region and federal level higher attention and support to strengthening the health and education sectors should be given priority.
- The program Planning, reporting, monitoring and evaluation system is not properly organized and established. The program operational manual gives each WaSH sector Ministries the responsibility of compiling region specific sector planning and reports. However, during the course of EFY 2007, all sector ministries have not provided both the plan and the report to the NWCO. As a result of this the NWCO was not able to produce quarterly reports as per the requirement of the POM. For the annual planning and reporting, the NWCO was forced to receive incomplete and delayed reports and plans directly from the regions. This has caused additional burden to the NWCO in the compilation and refinement of the submitted documents. Not to repeat the same problem in the coming EFY 2008, all sector ministries should give proper attention to reporting and planning activities. All WaSH implementing structures need to strengthen their M&E staffs so as to provide reports with best quality and timeliness, per the program's reporting guideline and format.
- It is important to have the proper awareness on the program operating guidelines to all implementing staffs at all level. In this regards the role of the Financial management manual, the procurement manual and the environment safeguard frameworks and guidelines are expected to be well understood by all implementing structures. Hence, finalizing the Financial manual and providing cascaded training to all implementing agencies need to be given prior attention. In addition refreshment trainings on procurement and environment and social safeguard should also be provided to strengthen the awareness of staffs for knowledge based implementation of the program.

One WASH National Program – CWA 2007 Annual Report

9.4. Annex 4. One WaSH National Program –Consolidated WaSH Account Joint Startup Implementation Support Mission – JISM 1 (December 8-19, 2014)

The first One WaSH National Program Consolidated WaSH Account Joint Startup Implementation Support Mission – JISM 1 conducted from December 8-19, 2014 in all regions and sector Ministries.

The Major objective of the mission was to review and support the preparation and readiness of implementing agencies at all levels for the immediate implementation of part of the One WaSH National Program as per the Program Operations Manual.

The mission visited all the regions and selected woredas and towns. The mission met with the National WaSH Coordination Office, PMUs at the MoWIE, WRDF and Regional WaSH implementing agencies that includes Bureau heads and PMU staff. This Joint Aide-Memoire summarizes the key mission findings and agreed actions which were discussed on December 23, 2014 at a wrap-up meeting chaired by H.E Ato Kebede Gerba, State Minister, Ministry of Water, Irrigation and Energy.

The mission takes note that, after the wrap up session of the mission, Ministry of Finance and Economic Development has issued a revised guideline on the salary scale for contractual staff, mainly for Ministry of Water, irrigation and energy and corresponding bureaus at the regional level. Ministry of Water, irrigation and energy and regional bureaus are expected to act quickly in line with this guidance to strengthen their PMUs. However, there is an emerging issue of addressing uniformly the staffing issue in Education and Health both at the national and regional level. The joint mission urges the government of Ethiopia to give this a priority to put in place the right staff with the required qualification and number in all the implementing agencies and at all levels

Agreed Actions and Next Steps

No	Action	Responsibility	Date
1	Revise and submit the consolidated procurement plan for the World Bank review and clearance	NWCO	December 31, 2014
2	Finalize the deployment of all the required staff	NWCO, All PMUs, Woredas	March 2015
3	Update and issue a revised WaSH - FM manual	MoFED	February 28, 2015
4	Provide a cascaded introductory training on the revised FM manual to all implementing agencies	NWCO, MoFED, BoFEDs	Starting from March 2015
5	Organize and conduct a National program launch workshop	NWCO and all	February 2015
6	Provide cascaded training on procurement	NWCO, BoFEDs , WB	Starting from March 2015
7	Provide cascaded training on Safeguards (Social and environmental)	NWCO, Regional Bureaus of Water and WB	March 2015
8	Identify the additional training and Capacity Building needs	NWCO and PMUs	February 2015
9	Officially communicate the POM to regional and federal Implementing Agencies with covering letter introducing it as guiding document for implementation of the CWA	MoFED/NWCO	December 31, 2014
10	Request regions to assign Regional WaSH Coordination Office Coordinator and notify the name of the coordinator to the NWCO	NWCO	January 15, 2015
11	(i)Follow up and support with/to regional PMUs to ensure timely hiring and deployment of WWCs/TWCs and (ii)provide feedback on submitted procurement documents	MoWIE/FPMU	(i) ongoing (ii) January, 2015

One WASH National Program – CWA 2007 Annual Report

No	Action	Responsibility	Date
12	Recruit Procurement Specialist at all level as proposed in the POM and submit CVs of procurement specialists for Bank's review and clearance.	MoWIE PMU and regional PMUs	March 2015
13	Prepare procurement and contract monitoring formats and commence monitoring activity	All PMUs	February 2015
14	Distribute approved initial procurement plans to respective regions	NWCO	December 31, 2014
15	To follow up with regions and obtain the required baseline data for woredas and towns	NWCO	January 15, 2015.
16	To follow up update of the NWI and ensure that updated report to be produced	MoWIE/ NWCO	March 2015
17	Review the possibility of delegating the task of reviewing consultancy service to the regions	WB/NWCO	March 2015

- Achieved
- Semi achieved
- Not achieved

Next Joint review July 2015

As per the agreement during the last joint start up mission in December 2014, a joint team consisting of representatives from WaSH Ministries (MoWIE, MoH, MoE, and MoFED) and CWA pooling partners (DFID, AfDB, UNICEF and WB) proposed to conduct an implementation support and review mission from **July 20-August 7, 2015**.

The Major objective of the mission is to review and support implementation progress of program activities and ensure adherence to the principles and procedures of the POM.

The specific objectives of the mission include:

- ✓ The Review of the status of agreed actions during the Joint startup implementation review and support mission (December 9-19, 2014)
- ✓ The review and support of implementation progress by program components;
- ✓ The assessment of the status of disbursement and fund utilization
- ✓ The assessment of the status of procurement activities
- ✓ The review the status of staffing, institutional arrangement and capacity building.
- ✓ The review of the status of the functionality of the governance, coordination and program management structures at different level
- ✓ The review of the M&E and reporting arrangements
- ✓ The Review of the status of awareness and compliance to the agreed safeguardsetc;

The wrap up will be hosted by Oromiya region Adama Town is planned for **August 6- 7, 2015**.
