

# National WASH Multi-Stakeholder Forum 8 Hilton Hotel, March 30-31, 2017

PPP for sustainable water supply

*Restoring and Sustaining Water systems  
Functionality in Tigray- Pilot project*

By Tesfalem Hadgu (TWRB) &  
Yemane G/her (SNV)

# Objective & content

## Objective

- Contribute to the health & productivity of communities
- Draw a lesson for scaling-up program

## Content

- Why we run the pilot?
- Where?
- Who?
- What result do we get?

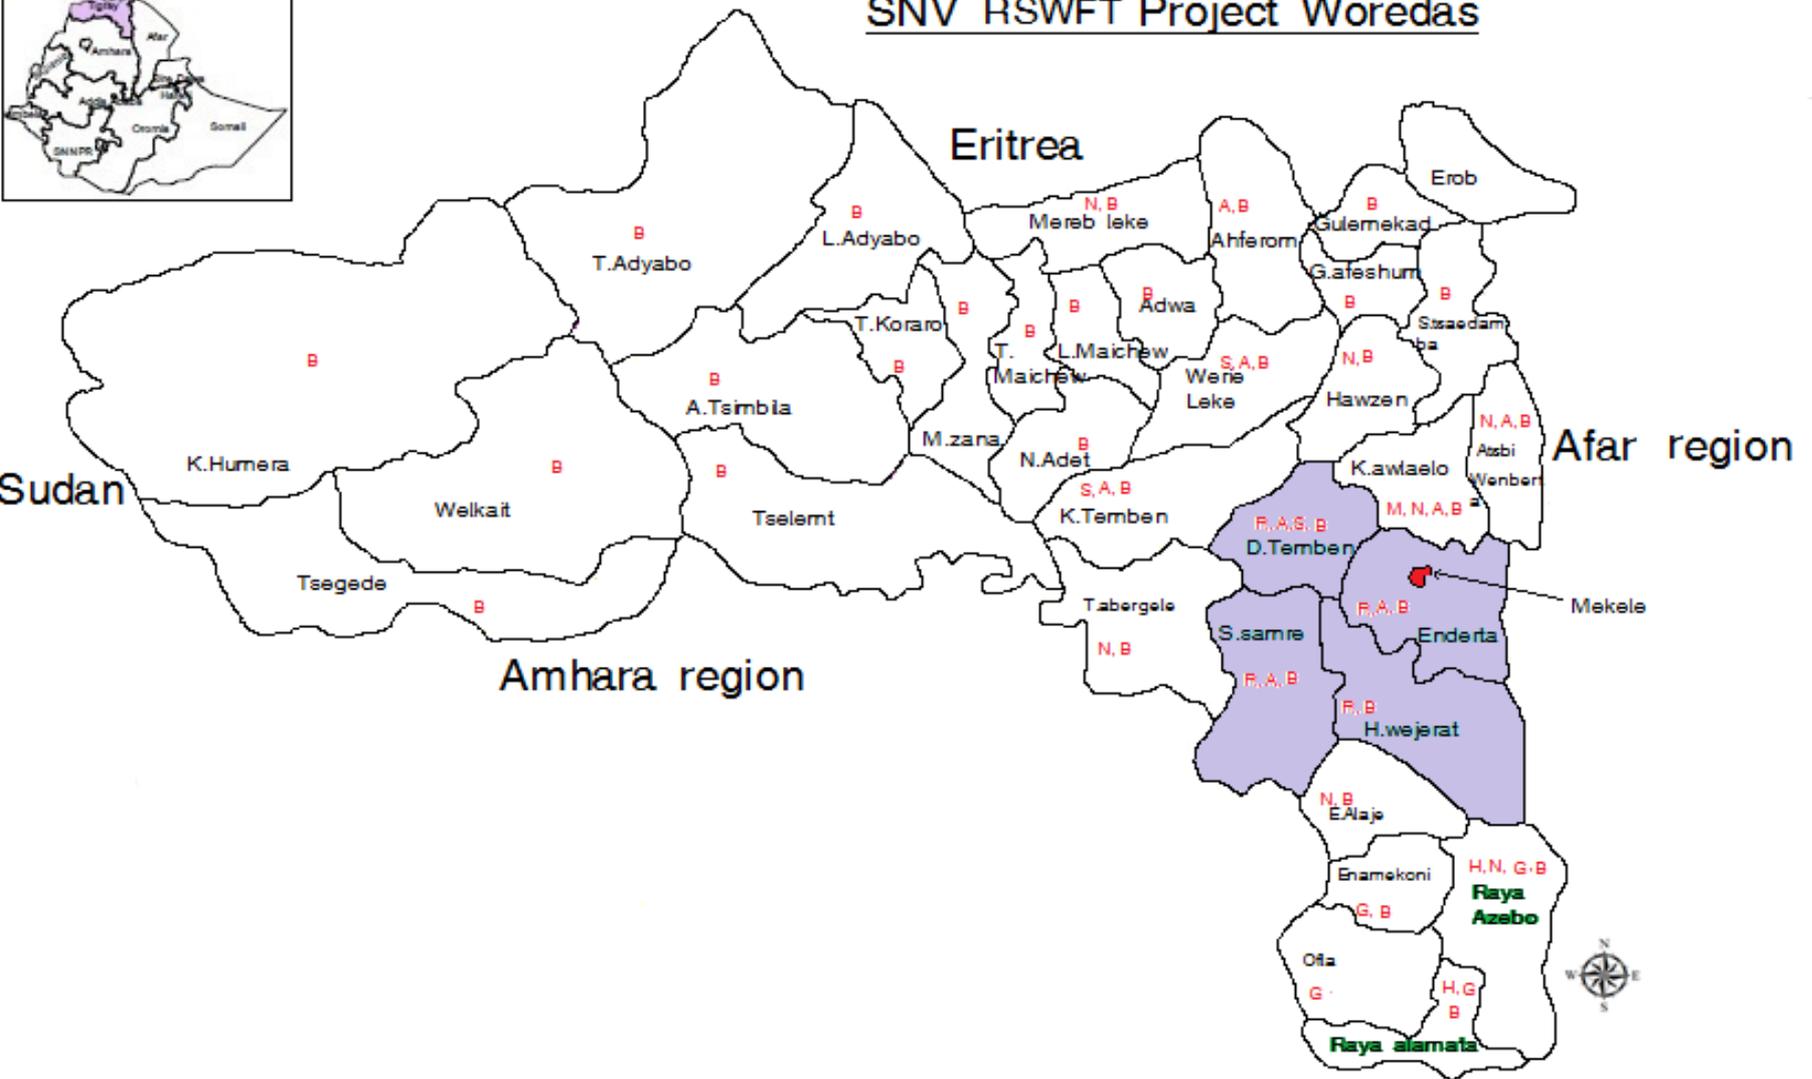

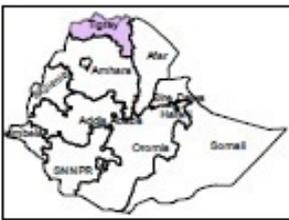

# Background

- High non-functionality rate
- Long downtime & lack of accountability
- Less transparent & poor WASHCOs financial performance
- unregulated type of management model (Gov't Subsidized/free, NGOs supported and community based model etc)
- Enabling policy provision

# SNV RSWFT Project Woredas

# Background

- **Households targeted-16,900**
- **Location- 4 Districts in Tigray**

Region

- **Financed by- AFAS FOUNDATION**

- **Implemented by- SNV,**

Woord and Daad with TRWRB

- **Project period- (April 2015-March 2017)**

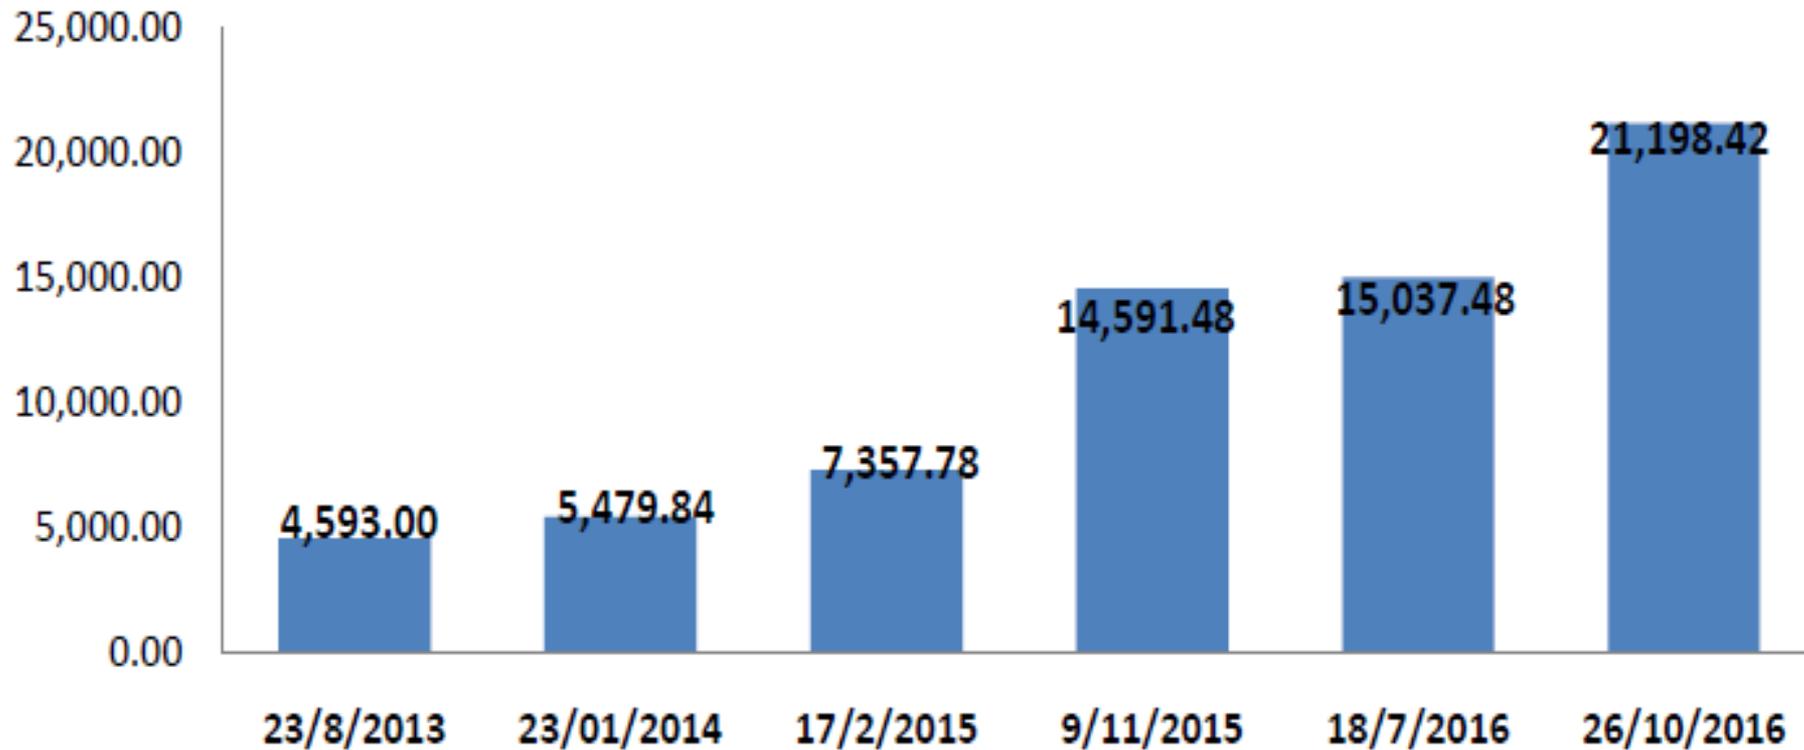

## Results

- 3 PLSP teams (3-5 members each) are operational
- 26 District level water staff trained on water quality, O&M monitoring logbook
- Financial performance of WASHCOs improved
- Non-functionality dropped from 18 to less than 10%

# Results...

Financial performance of Feleghafo village, Enderta woreda

# Recommendations

- Determination for upscaling experiences
- Regulation to enforce the policy provision
- Strong mechanism to monitor & boost WASHCOs financial performance
- Gradually handover the spare part supply service to PLSPs
- Utilize the PLSPs for all sorts of post-construction support service
- Joint effort to strengthen PLSPs (Gov't & NGOs)

# Proposal for strategic direction of WASH

- Privatize post-construction support (Water supply, Irrigation, Renewable energy & sanitation) at higher level
- Let's think of producing spare parts in country (PLSPs or private companies)
- Leave room for subsidy but through the PLSPs (during drought etc)

**NB:** 10 minute story clip will be presented
