

RWS Point Sources, Technology and Management

Document 02 - Main Contents of Parts A, B, C and D

Module/Part	Title	No. of pages
Part A	Introduction to O&M Management	11
	General Aims and Objectives Selected Technologies for the Preparation of this Manual Target Users of this Manual Principle of O&M O&M Mechanism How to use the Manual Structure of the Manual Preparation of this Manual	
Part B	Description of Water Sources & Technologies	8
	Background Hand Dug Well Shallow Well Spring Development Technology Options	
Part C	Technical O&M requirements	92
	General Causes of Failures of Water Supply Schemes Factors Affecting Sustainable O&M Management Steps towards Sustainability of RWS Schemes O&M Requirements for Hand- Dug Well O&M Requirements of Shallow Well Hand Dug Well and Shallow Well fitted with Hand Pump Spring Collection Chambers Capacity Building and Training Preventive Maintenance Unscheduled Maintenance Support System of Operation and Maintenance Health and Environmental Requirements	
Part D	Rural Water Supply Schemes Management	48
	Introduction Objectives Community Managed WASH Systems	

RWS Point Sources O&M Manual, Spare parts, Monitoring, Water Safety, O&M Planning and Implementation

Document 03 - Main Contents of Parts E, F, G and H

Module/Part	Title	No. of pages
Part E	Rural Water Supply Spare Parts Management	62
	Introduction Spare part Outlet Models Principles of Planning SP Outlet Allocation SP Outlet Allocation Plan Procurement and Service Linkages Steps to Establish a SP outlet Operation of a SP Outlet Supervision of SP outlets Roles of various Stakeholders in Spare part Management Standardisation Quality Control and Quality Assurance	
Part F	M&E and reporting system update	33
	General Purpose of the Monitoring Objective of Monitoring Main Monitoring Aspects Monitoring Framework Performance Evaluation of O&M Performance based Rewarding and Penalty Mechanism Reporting and Documentation	
Part G	Water Supply Safety Plan	23
	Project Background What is a Water Safety Plan? Purpose of WSP Benefits of using the Water Safety Plan Information required Who use this Manual? Developing a WSP Climate Change in WASH Toolkits for climate risk management, screening and vulnerability Monitoring and evaluation, vulnerability reduction Assessment	
Part H	Preparation of Action Plan and implementation of O&M	23
	Preparation of Action Plan Implementation of O&M Activities	

**RPS O&M Manual,
Water Sources and Electromechanical Equipment
Document 04 – Main Contents of Parts A, B and C**

Module/Part	Title	No. of pages
Part A	Introduction	22
	General The Manuals On the Use of the Manual Manual Organization Objectives of Operation and Maintenance Necessity of the Manuals Definition of Operation and Maintenance Requirements for Sustainable O&M Rural Piped System Classification of Maintenance O&M at National Level Who and How will use this Manual? Dissemination of the Manual Revision of the Manual O&M at National Level	
Part B	Water sources for water supply	53
	General Objective of O&M for Water Sources Water Sources Sources of Water Supply Facilities Operation and Maintenance Requirements Scheduled Maintenance Schedule Water Sources Protection	
Part C	Electro-Mechanical (E_M) Equipment	82
	General Components in Pumping Station Types of Pumps Brands of Pumps and Generators under operation in Ethiopia Operation and Maintenance Common to all Pumps Preventive Maintenance of Pumping Equipment Maintenance of Pumping Station Driving Equipment Control Panel Facilities for Maintenance and Repairs Renewable Energy System Safety Practice Troubleshooting	

RPS O&M Manual
Distribution Systems and Spare Parts
Document 05 – Main Contents of Parts D and E

Module/Part	Title	No. of pages
Part D	Transmission and distribution system	60
	General Objectives Description of the System Transmission Line Distribution Lines Service Connections Public Taps Water Kiosk Pipe Materials Pipe Joints Fittings Valves Water Meters Operation and Maintenance Requirements Monitoring of the System Monitoring Water Quality Maintenance Planning Process Service Reservoir Break Pressure Tank Public Water Point and Kiosk Buildings and Structures Scheduled Maintenance Record and Report	
Part E	Spare part management	109
	Introduction Organization Set Up for Supply Chain of Spare parts Daily Shop Operation and Management Replenishment and Price Revision Stock Management Financial Management Accountability and Transparency Assessing Spare parts Requirements Standardisation Linking with Micro Finance Institutes Quality Control and Quality Assurance Supervision and Monitoring of SP outlet and shop	

RPS O&M Manual
Equipment Management, Leakage Detection, Asset
Management, Water Quality

Document 06 – Main Contents of Parts F, G, H and I

Module/Part	Title	No. of pages
Part F	Equipment and tools management	33
	Purpose and Scope Organization of the Manual Equipment Administration Equipment and tools utilization/Operation Control System Maintenance Planning, Scheduling and Controlling Inspection and Quality Control Maintenance Organization Maintenance Planning and Scheduling Maintenance Control Systems Shop Operation Maintenance Records Maintenance Reports	
Part G	Water audit and leakage detection & control	28
	General Water Audit Objectives of Water Audit Objectives of Leakage Detection and Control This Guiding Manual Non-Revenue Water Types of Leaks Knowing Your Water Losses- The Water Balance Understanding of Commercial Losses Understanding Physical Losses Understanding District Meter Areas Leakage Reduction Planning	
Part H	Asset Management for Water Supply System	53
	Introduction Asset Inventory Existing Schemes Operating Condition Survey Review of Maintenance Procedures Fixed Asset Valuation Stock Physical Inventory Level of Service Critical Assets Life Cycle Costing Long-Term Funding Strategy Implementation	

Document 06 – Main Contents of Parts F, G, H and I (Continued)

Module/Part	Title	No. of pages
Part I	Water Quality M&S	81
	General Objectives of Water Quality Monitoring Importance of Water Quality Status of Water Quality Monitoring Legal and Institutional Basis Roles and Responsibilities of Stakeholders in WQMS Water Supply and Surveillance Agency WASH Related Diseases Quality of Water Ethiopian Drinking Water Quality Standard Surveillance Program Information Management Resources for a Monitoring Program Human resources development and training Surveillance Action Sanitary Survey Water Sampling and Analysis Data Analysis, Interpretation and Reporting Use of Field Water Testing Kit Disinfection of Water Supply System Application of WHO Drinking Water Quality Standard Data Management, Documentation, and Reporting Monitoring and Evaluation	

RPS O&M Manual
Financial and Community Based Management
Document 07 – Main Contents of Parts J and K

Module/Part	Title	No. of pages
Part J	Financial Management	88
	General Water Resources Management Policy Preparing Annual Budget Sources of Income Determining Expenditures Principle of Cost Recovery Water Revenue Tariff Fixation Overview of Account Categories Accounting Policies Procedures Accounting System Formats and Content of Financial Statements Management Accounts Financial Report Auditing O&M Financial Supports	
Part K	Community Based Management	54
	General Purpose of this Manual Scope of the Manual Definitions Legislation Framework Principle of Community Based Management Organizational Structure of Community Based Management Formulation of By-Law Asset Transfer Conflict Management and Resolution	

RPS O&M Manual
Monitoring and Human Capacity Building
Document 08 – Main Contents of Parts L and M

Module/Part	Title	No. of pages
Part L	M&E and MIS	60
	General Objective of O&M Monitoring Scope of this Manual Benefits of monitoring Main Monitoring Aspects Monitoring Structure Process of Monitoring and Information Flow Monitoring Plan Monitoring Tools Monitoring Framework Monitoring of O&M Major monitoring by support organizations Ethiopia WASH M&E Performance Measurement and Evaluation of O&MM Management Information System (MIS) Records, Reports and Documentation	
Part M	Human power and capacity building	30
	General Who will use this Manual? Need for Human Resources Development Organizational Structure of Large Rural Piped System Job Descriptions for Large RPS Technical Section Financial Section Administrative Section Organizational Structure of Rural Piped System Training Need Assessment	

Pastoral Area Water Supply
Sand and Hafir Dams, Berkas, Rainwater Harvesting
Document 09 – Main Contents of Parts A, B, C and D

Module/Part	Title	No. of pages
Part A	Introduction	17
	General Description of Pastoral areas Water Supply Facilities Objectives of Operation and Maintenance Definition of Operation and Maintenance Requirements for Sustainable O&M Classification of Maintenance Manual Organization Who and How will use this Manual? Dissemination of the Manual Revision of the Manual	
Part B	Sand Dam	13
	General What are Sand Dams and Sub Surface Dams? Components Maintenance and Management	
Part C	Hafir Dam and Berkad	46
	General Purpose of this Manual What is Haffir Dam? What is Berkad? Components of Haffir Dam and Berkad Managing Haffir Dam and Berkad Operation and Maintenance of Haffir Dam Slow Sand Filtration (SSF) Clear Water Well (CWW) Pump/generator house Berkad	
Part D	Rainwater harvesting	31
	Introduction Scope of the Manual Roof Top Rainwater Harvesting Rock Catchment Rain Water Harvesting Management of RWH Schemes	

Solar and Wind Energy and Pastoral Area WS

Solar and Wind Energy, Community and Financial Management of Pastoral Areas

Document 10 – Main Contents of Parts E, F, G and H

Module/Part	Title	No. of pages
Part E	Solar Energy	42
	General What makes up a Solar Power System? Building a Solar System Components of Solar Energy System Operation Maintenance Procedures Non-Routine Maintenance / Troubleshooting Miscellaneous	
Part F	Wind Energy	25
	General What is Wind Power? Why Wind Power? Identification of Components Operation and Maintenance Equipment Functional Checks Spare Parts Inventory Replacement Parts of the Turbine Consumables Establishment of O&M Plan Documentation	
Part G	Community Based Management of the Pastoral Areas	37
	General Purpose of this Manual Scope of the Manual Definition of Community terms Roles and Responsibilities of Main Stakeholders in O&M Management Asset Transformation Conflict Management and Resolution	
Part H	Financial Management of the Pastoral Areas	49
	General Water Resources Management Policy Preparing Annual Budget Sources of Income Determining Expenditures Daily Financial Management Management of Daily Cash Movement Access to other sources of funding Financial Report Auditing
