

***Presentation
on
the Ethiopian
Water Supply, Sanitation & Hygiene
Sub-sector Framework Review Report***

***Presented by
Mrs. Martha Solomon (Head of PDC&ER
Dept, MoWR) & Dr Eric Buhl Nelson
(EUWI/ETHCD Facilitating And Report
Consolidating Consultant)
October 11 2006***

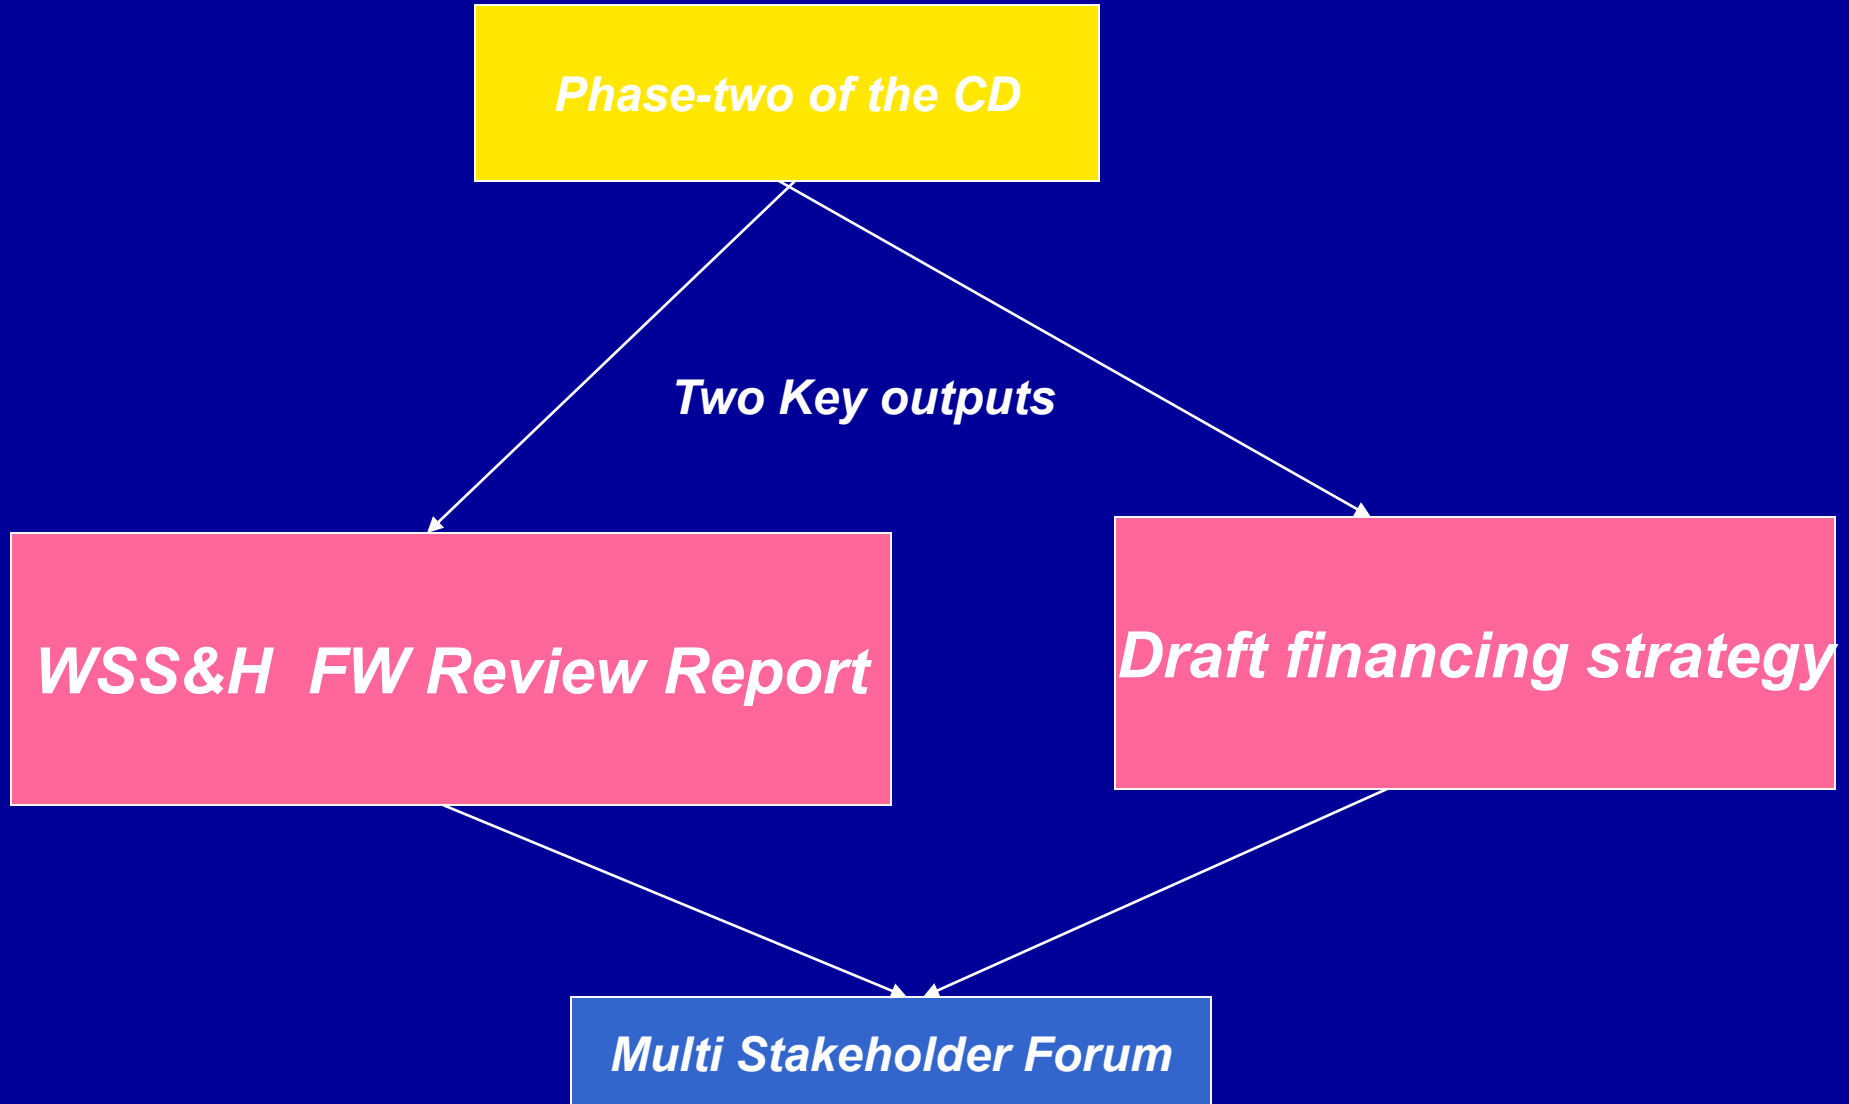

Presentation Outline

- ✓ **Introduction**
 - ✓ **Purpose of the Report**
 - ✓ **Sub Sectoral linkage With PASDEP**
 - ✓ **Sectoral Situation and Performance Measures**
 - **Performance review principles**
 - **Golden indicators Performance Measures**
 - **Tentative 2006 Results – Golden indicators**
 - **Tentative 2006 Results – performance measures**
 - ✓ **Sectoral Constraints, Opportunities, Potential intervention (highlighting by Eric and details by WG representatives)**
 - **Working group outputs**
 - ✓ **Key Undertakings**
 - **Undertakings arising from group work**
-
- The diagram shows a flow from the first three items (Introduction, Purpose of the Report, Sub Sectoral linkage With PASDEP) to 'Martha'. A bracket groups the next three items (Sectoral Situation and Performance Measures, Sectoral Constraints, Opportunities, Potential intervention, and Key Undertakings) and points to 'Eric +WG'.

# 1. *Introduction*

- *Review of the WSS&H FW and producing the report was one of the major activity envisaged on **phase two of the dialogue process** expecting the output will further feeds in the MSF (Phase three) which we have already started holding today*
- *Looking into the Structure of the County Dialogue this is the key output of phase two of the dialogue process*

- ***WSS&H FW Review Report***

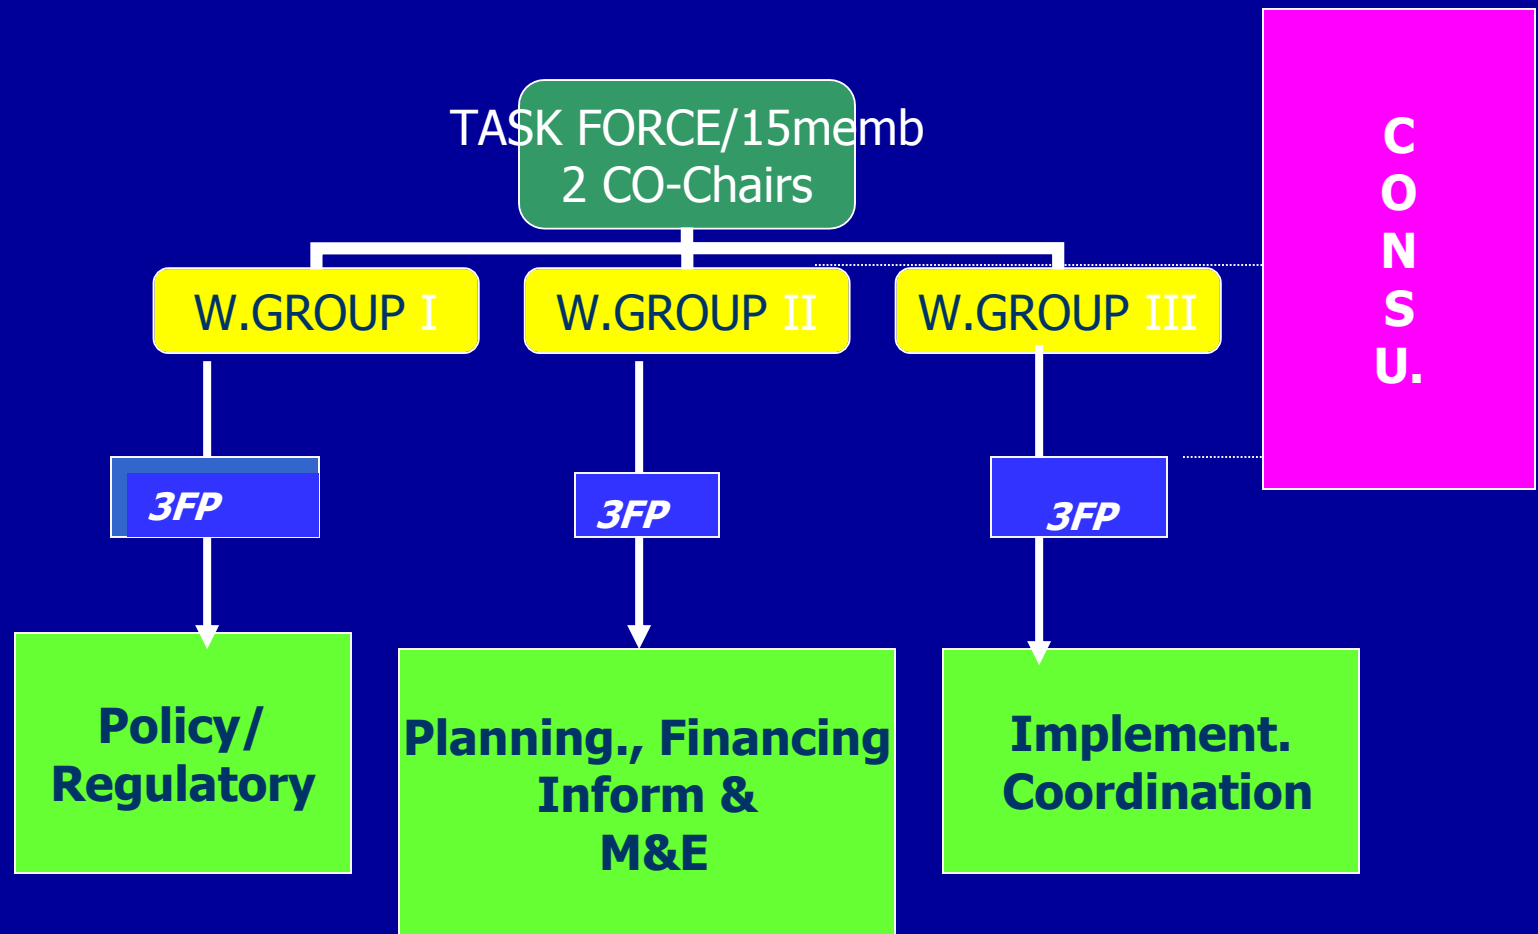

# Structure of the *EUWI -WSS&H ETH.* CD

- ***The preparation of the review report is done as per the recommendation of the generic terms of reference which was provided by EC for the CDs and which states as one of the major activities, preparation of Country's MDG Road map .***
- ***But here in Ethiopia a lot has been done in the WSS&H sub sector and there was no need to redo what already has been done in the sector. As the intention of the Country dialogue process is to add up value on the already started efforts and not to Reinvent the wheel !!***
- ***Accordingly, reviewing the Water Supply Sanitation and Hygiene Framework was performed by focusing on three major areas, identified during the launching event .***
- ***The three major areas as mentioned earlier are***
  - ✓ *Policy and Regulatory*
  - ✓ *Planning, Financing, Information & M&E; and*
  - ✓ *Implementation & Coordination*

- *The task of preparing the review tasks was performed by three Working Groups, which constitutes the representatives of all the key actors (Government, Donors, Private Sector, Civil Society/NGOs)*
- *And the overall management of the CD is handled by the Taskforce formulated with same composition as WGs.*

# COUNTRY DIALOGUE SET UP

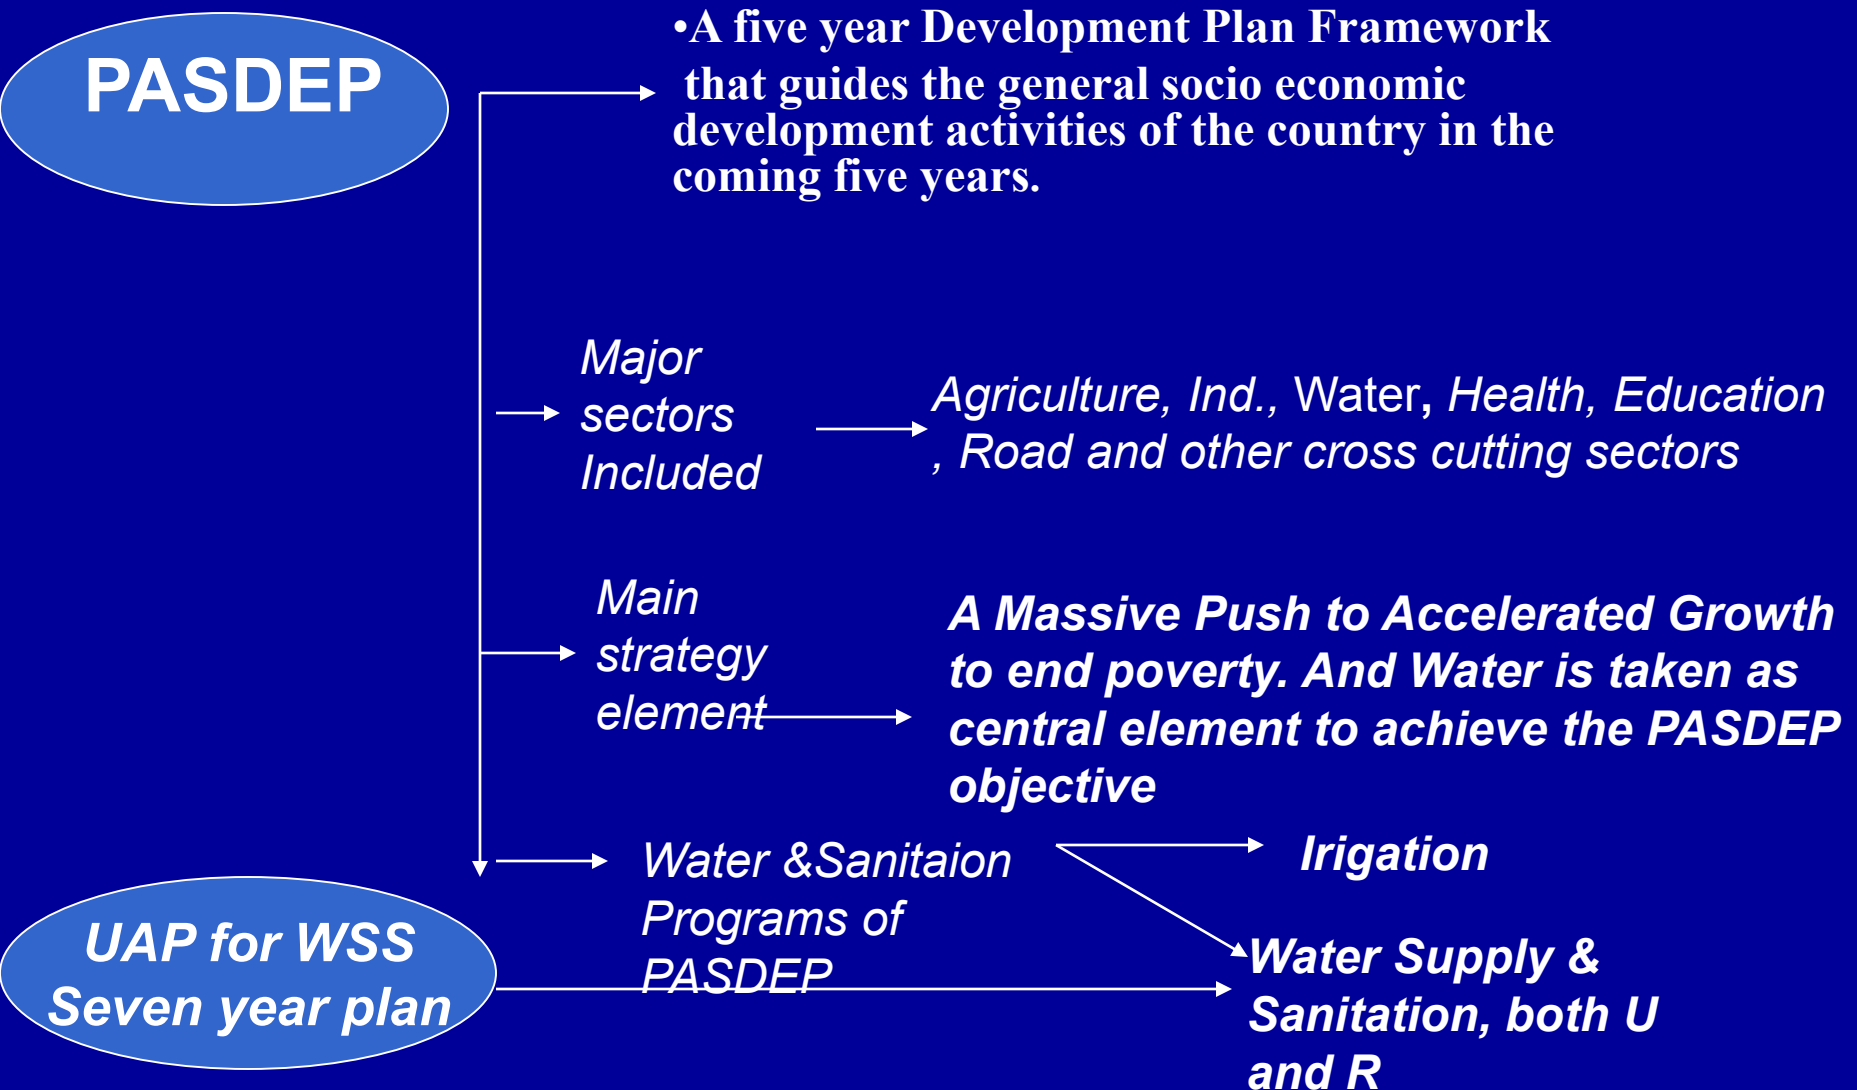

## **2. Purpose**

- *The main purpose of this Review report is*
  - *To highlight the overview of the Ethiopian Water Supply, Sanitation & Hygiene sub-sectoral Framework, which includes the full set of policies, strategies, regulations, plans implementations, M&E and Coordination efforts.*
  - *To outline the sectoral constraints and opportunities in line with the major Framework elements*
  - *And also to come up with potential intervention, and recommendations from which the key undertakings of the FORUM will be drawn at the end.*
  - *To provide a model for yearly performance review to fit in ongoing sub-sector M&E.*

### 3. Sub-sectoral linkage with PASDEP (A plan for Accelerated Development to End Poverty)

# **PASDEP and UAP ( Universal Access Plan for WSS)**

- **UAP -----Objective**
  - ✓ **To provide clean potable water and improved sanitation services to all citizens of the county over the coming Seven Year (2005-2012)**
- **The first five year program of UAP (2005-2010) are taken and are included as part of PASDEP WSS plan**
- **Hence the PASDEP WSS program is the subset of UAP.**

# Strategies of PASDEP (which focus on water & sanitation)

- ✓ ***Implement Considerable and accelerated tasks in improving the WSS coverage making the five year Plan of PASDEP part of the Universal Access Plan which is aimed at Providing access to all the population of the country with clean potable water and improved sanitation services over the coming seven years;***
- ✓ Promote enhanced irrigation development in an integrated manner for the more enhanced contribution of the sub-sector to the country's economic growth, for the alleviation of poverty & food insecurity problems;
- ✓ Emphasise & promote on multipurpose development wherever applicable
- ✓ Build the capacity at different level particularly at the lower level where the actual implementation is taking place
- ✓ Focus on low cost, affordable and labour intensive technologies
- ✓ Promote gender integration and participation in designing and implementation of water projects and programs

# *The outstanding issues related to water & sanitation which are outlined in the PASDEP*

- *Building Implementation Capacity at all levels*
- *Mobilizing the Required huge Resource*
- *Enhance the Development of low cost and community managed technologies*
- *Establishment of efficient and enhanced M&E system*
- *Enhancing participation & Building the capacity of local public/private sectors*
- *Enhancing the participation of CSOs and NGOs in developing the sector*
- *Development of the required infrastructure facilities*

Hence Holding a MSF like the one at hand could serve as a best platform to bring all the actors together to enable them contribute to address the above mentioned outstanding issues outlined in the PASDEP
