

# National WASH Multi-Stakeholder Forum 8

## ***Progress of MSF 7 Undertakings***

Abiy Girma NWCO  
Hilton Hotel,  
March 30-31, 2017

# *Introduction Multi-Stakeholder Forum (MSF)*

- The annual Multi-Stakeholder Forum (MSF) is the **largest and most important WaSH sector** conference in Ethiopia.
- It was begun in 2006 under the auspices of the **EU Water Initiative (EUWI)**.
- Ownership of the forum was handed over to the **Government of Ethiopia in 2009** and has since been led by the MoWIE.
- A total of **seven MSF events organized** in the past years with a great participation from the federal and regional government representative, development Partners, academic institute NGOs and CSOs.

# *Main Objectives Multi-Stakeholder Forum (MSF)*

- The primary objective of the MSF is **to increase the awareness and understanding** of the Development Partners and stakeholders by **reviewing the latest sector development and achievements**.
- The MSF is also to demonstrate the commitment of the **Government of Ethiopia** of **strongly leading the development of the Ethiopian WaSH sector according to the principles of the WIF** and the OOWNP Document and to provide guidance on how to lift the OOWNP into the national priority program.

## *Multi-Stakeholder Forum (MSF)*

- As agreed in the MoU and WIF the annual **Multi-Stakeholder Forum and Joint Technical Review** are the main instruments for the evaluation of WaSH activities in the country.
- Which is **review different thematic areas that selected by all WaSH actors.**
- The findings and recommendations from the JTR expected to be presented at the **MSF events.**

# ***MSF 7 Undertakings***

## **MSF- 7 Undertakings**

***Urban & rural sanitation and hygiene in One WASH***

***Ensure the sustainability of the WASH services***

***Emergency WASH linked with One WASH development works***

***Review OWNP Phase I and design appropriate resources mobilization and utilization mechanisms for Phase II***

***Enhanced One WASH capacity building efforts and coordination***

***Focus to institutional and household WASH services in One WASH***

# *Undertaking # 1:*

## *Urban & rural sanitation and hygiene in One WASH*

- **Finalize the action plans** and MoU for the implementation of the Integrated Urban Sanitation & Hygiene Strategy (IUSHS)
- Enhance integrated urban sanitation and hygiene practice through
  - Establishing transparent and effective coordination and management systems
  - Increasing access to services, establishing standards to ensure quality, regulation and enforcement of the IUSHS.
- Review the status and the achievements of existing rural sanitation & hygiene strategy and action plan, CLTSH approach, ODF verification and certification processes in connection with the new Hygiene and Environmental Health Strategy.

# *Undertaking # 1:*

## *Urban & rural sanitation and hygiene in One WASH*

### **Progress to Date**

- Stakeholders reviewing the prepared MoU for the IUSHS coordination at federal and regional levels
- CLTSH approach, ODF verification and certification processes reviewed
- New ODF verification protocol prepared
- New Hygiene and Environmental Health Strategy and action plan prepared

### **Outstanding Activities**

- Standards and Regulations for IUSHs not established
- National Hygiene and Environmental Health Strategy and action plan not yet endorsed

## *Undertaking # 2:*

### *Ensure the sustainability of the WASH services*

- **Strengthen and scale up the encouraging progress in WASHCO legalization** success in SNNPR.
- **Integrate WASH services with Water Resources Management (WRM)** activities because unreliable water sources affect sustainable WASH services. Interfaces/linkages between WASH-MSF and WRM-MSF could be enhanced through joint planning, implementation, learning and information sharing.
- **Strengthen and up scale the implementation of climate resilient water safety planning**, because the sustainability of WaSH services are also affected by water safety issues that could occur from the catchment to the point of use.

# *Undertaking # 2:*

## *Ensure the sustainability of the WASH services*

### **Progress to Date**

- WASHCO legalization scaled up in same of the regions
- **Integrate WASH services with Water Resources Management**
  - Teams are planned JTR and MSF together and preparations under process
  - Budget Secured for JTR and MSF
- WASH and WRM integration testing included into COWASH project through Social, Environmental and Climate Risks screening and management process
- Water Safety Planning tested with different schemes. Analysis of these results and scaling up further discussed in this MSF

### **Outstanding Activities**

- WASHCO legalization not scaled up in all 9 Regions
- Integrated of WASH and WRM as well as implementation of climate resilient water safety planning not yet in the state of scaling up

## *Undertaking # 3: Emergency WASH linked with One WASH development works*

In order to improve long term impacts of the emergency WASH the following was agreed:

- Link Emergency WASH with WASH development efforts. Accordingly, include emergency WASH plans into annual plans of all regional WASH sector bureaus and offices.
- Identify and prioritize WASH development projects by undertaking relevant studies and designs. This is to avoid the firefighting approach of Emergency WASH.

## *Undertaking # 3:*

# *Emergency WASH linked with One WASH development works*

## **Progress to Date**

- Emergency WASH coordination established with development WaSH
- Development Water Sector Disaster Management Strategy prepared

## **Outstanding Activities**

- Climate resilient planning (location), technology (depth) and implementation of WASH facilities
- Reduction of response time to the emergency situation
- Capacity building (guidelines and training) at all levels for integrated emergency/development WASH

# *Undertaking # 4:*

## *Review OOWNP Phase I and design appropriate resources mobilization and utilization mechanisms for Phase II*

The One WASH National Program was agreed to be further developed to reflect the targets set in the Growth and Transformation Plan II as follows:

- **Review the One WASH** implementation phase I (2014- 2015) and **update the program document** for One WASH phase II (2016-2020) reflecting the GTP II targets;
- Provide adequate awareness to **clarify the confusion between One WASH and consolidated WASH account (CWA)** program;
- Enhance **WASH resources mobilization** efforts to address the huge gaps between WASH service delivery demands and the available resources;

# *Undertaking # 4:*

## *Review OWNP Phase I and design appropriate resources mobilization and utilization mechanisms for Phase II*

### **Progress to Date**

- ToR prepared and consultant selected to review the One WASH Program implementation Phase I and update the One WASH phase II plan done
- Review of One WASH Program ongoing
- Preparations made to conduct the National WASH (water) Inventory 2
- Assessment of One WASH Coordination done and regional coordination offices established and the capacity of the coordination offices staff built

### **Outstanding Activities**

- One WASH program review and Phase II planning not completed
- Sustainability check development as part of One WASH implementation not developed

# *Undertaking # 5:*

## *Enhanced One WASH capacity building efforts and coordination*

The WASH sector capacity is going to be strengthened by completing ongoing works and by introducing new capacity building systems such as:

- Complete the **RWS O&M manual & strategic framework** as well as the **training materials and organize the O&M trainings**;
- Develop the One WASH **capacity building strategy for urban and rural water services**;
- Develop and establish water supply regulatory service;
- Develop WASH documentation and knowledge management system, and
- Develop national performance management system for urban and rural water supply.

# *Undertaking # 5:*

## *Enhanced One WASH capacity building efforts and coordination*

### **Progress to Date**

- Rural water supply O&M manual and the strategic framework finalized
- Training manuals for the O&M manual developed
- Development and establishment of water supply regulatory service started
- First One WASH Program 2008 EFY annual report prepared

### **Outstanding Activities**

- Endorsement of the rural water supply O&M strategic framework and manual missing
- Completion of the water supply regulatory service framework and establishment missing
- Not developed the One WASH capacity building strategy
- WASH documentation and knowledge management system not established

# *Undertaking # 6:*

## *Focus to institutional and household WASH services in One WASH*

The institutional and household WASH services are expected to improve through the following actions:

- **Strengthen the support and follow up of the implementation of institutional WASH** in terms of financing mechanisms, management, implementation structure etc.
- **Put in place sound monitoring and reporting mechanisms for institutional WASH.**
- Develop institutional WASH financing mechanisms
- Identify and introduce appropriate technologies in the provision of household WASH services, particularly for Self-Supply Acceleration (SSA) program.

# *Undertaking # 6:*

## *Focus to institutional and household WASH services in One WASH*

### **Progress to Date**

- The School WASH Strategy , Strategic Action Plan and guidelines preparations are in final stages
- School WASH indicators are included in the newly developed Education MIS data base (Completed)
- Household latrine options manual development is in final stages

### **Outstanding Activities**

- Training of regions and woredas on School WASH Strategy, action plans and use of guidelines still remaining
- Resource mapping to finance the school WASH program still to be done

# Thank You
